SPEEDIER

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement N° 847034

IMPACTS

8 GWh & 1,280 tCO₂

Average primary energy
saving per year

305

Staff to be trained

50 SPEEDIER Experts

Building capacity

Enabling policy

Providing direct means to
Members States

THE PROJECT

SPEEDIER is a highly innovative one-stop-shop solution that applies an integrated approach to energy management, providing information, advice, capacity building, energy auditing, financing, implementation of energy efficiency solutions and monitoring of impacts.

The project delivers a self-financing outsourced energy management service with much benefit to SMEs, enabling them to implement energy conservation measures and also obtain access to the energy services market. The service will be available via energy consultants, auditors and experts and will facilitate the uptake of energy audits, and the subsequent implementation of energy efficiency measures in SMEs. The service also streamlines for SMEs the process of identifying and implementing energy saving measures by outsourcing all time-consuming energy management activities that require technical expertise.

The iterative cycle of implementing energy conservation measures, determining the savings against an agreed baseline, ring fencing those savings and reinvesting them into additional measures is the core innovative principle of the SPEEDIER Service that can be applied to both SMEs and large enterprises.

OBJECTIVES

To facilitate the uptake of energy audits and implementation of the resulting energy conservation measures in SMEs.

To demonstrate the effectiveness of the self-financing mechanism.

To enhance the energy culture of SMEs through a series of engagement awareness and capacity building activities.

To demonstrate the SPEEDIER Service as an innovative & effective tool.

To increase the skills of the key market stakeholders.
