This project has received funding from
the European Union's Horizon 2020 research and
innovation programme under grant agreement No 847034

1 Executive Summary

The primary aim of SPEEDIER is to provide a self-financing outsourced energy management service to SMEs, by outsourcing the role of energy manager to SPEEDIER Experts and, by that, allowing to access the expertise needed at the required time, leading to greater uptake of energy audits and implementation of energy efficiency measures.

This document corresponds to the Final Communication and Dissemination Plan deliverable, describing the activities undertaken in the period including month 25 (M25) to M30 as well as the actions to be adopted by the SPEEDIER project in the following two years after. All partners contribute to dissemination and communication activities in line with the aims and goals of the plan.

1.1 Context of WP8

The objectives of WP8 are to:

1. Enable future exploitation of the results to their full potential by disseminating and communicating them to the relevant stakeholders who will use and implement them;
2. Ensure that the findings of the programme are widely communicated to the public in general;
3. Support the market uptake of research and innovation results;
4. Prepare the corporate image and a set of materials for the promotion and comprehensive dissemination of SPEEDIER Service and its outcomes.

1.2 Objective of Task 8.1

A detailed Dissemination & Communication Plan (DCP) outlining the project's target audiences, strategies for engaging the target audience and activities was produced in M3 of the project. Updated versions followed in M12 and M24. This document addresses the approach to dissemination and communication from month M25 until M30.

1.3 Objective of Deliverable 8.5

Deliverable 8.5 corresponding to the final dissemination and communication plan aims to review all the activities performed during final phase of the project. It describes the different actions implemented to determine the degree of compliance with the Key Performance Indicators (KPIs) established during the project life in [Deliverables 8.2, 8.3 and 8.4](#).

Horizon 2020
European Union Funding
for Research & Innovation

This project has received funding from
the European Union's Horizon 2020 research and
innovation programme under grant agreement No 847034

2 Review actions M25-M30

2.1 Offline actions

2.1.1 Printed materials

At the beginning of the project, SPEEDIER produced a series of printed documents with the purpose of them to be distributed in the events partners were to attend.

Due to COVID-19, the distribution of these materials has been widely affected and it was decided not to produce new editions of brochures or posters. Nevertheless, partners were encouraged to share with stakeholders the online versions, made available on the [website](#) on its 4 languages.

To try to overcome the challenge or not being able to participate in face-to-face events, SPEEDIER consortium partners have reinforced email contacts, online meetings, and calls with stakeholders, to guarantee that KPIs are achieved. Concrete actions are described below, and more details can be found on Annex 2 (dissemination tables).

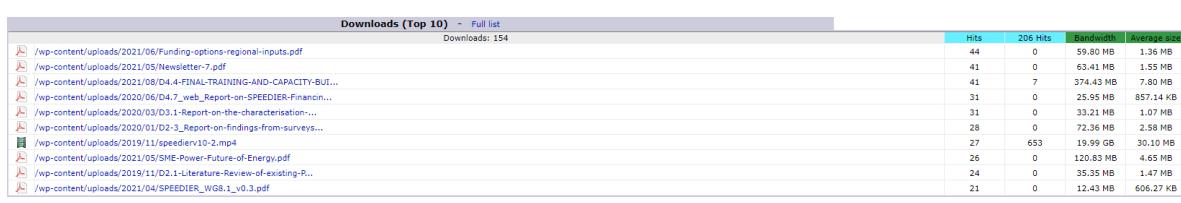

Figure 1: Analytics of documents downloaded from SPEEDIER website in September 2021

During M25-M30 an average of 120 downloads per month of the available documents on the website was achieved.

In total, during the project life, more than 2,000 documents have been downloaded by visitors from the website.

2.1.2 Press releases

Until M30, SPEEDIER has launched seven press releases, most of them also translated to the 4 languages of the pilot regions and released to international, national, regional and trade media. They were delivered to more than 200 media contacts each. Likewise, consortium partners contributed to the dissemination, and they also issued their own press releases (i.e. [TFC](#)).

Two press releases were issued during the first year of the project life (M15, M20) to announce the project [scope](#) and goals and the first [results](#). From their side, the [third](#) and [fourth](#) press releases informed about the joint webinar with sister projects, and the first training for SPEEDIER experts, respectively.

Regarding the latest press releases launched during M25-M30, they addressed the second capacity building [event](#), the participation at [EUSEW](#) with related projects and SPEEDIER's final [conference](#).

Press release 5– [English](#), [Italian](#), [Romanian](#), [Spanish](#).

SPEEDIER organises the webinar *A new approach to selling energy audits and energy efficiency advice to SMEs*

- Over two, half-day sessions, participants will be trained on the SPEEDIER Service: replication guide of the service, training modules, funding options and much more.
- The event will be hosted online on September 29 and 30 from 10 to 12:30 (CEST).

Cork (Ireland), September 7, 2021. The project **SPEEDIER** (acronym for SME Program for Energy Efficiency through Delivery and implementation of EneRgy Audits) will hold a webinar entitled *A new approach to selling energy audits and energy efficiency advice to SMEs*, to be hosted online on September 29 and 30, from 10 to 12:30 (CEST).

Over two half-day sessions, attendees will be introduced to the SPEEDIER Service and will learn about a new approach to persuading SMEs to undertake energy audits and implement energy efficiency measures. The different sessions will address the main barriers to the adoption of an energy culture and how they can be overcome. Likewise, SPEEDIER will present the innovative tools and techniques that the project is developing to assist energy experts to effectively engage SMEs in the energy transition and support them to perform energy assessments.

Registered participants will have the opportunity to raise their questions and provide feedback on the proposed contents of the online seminar.

Free registrations are available on: <https://speedier-service2.b2match.io/>

Energy efficiency in SMEs as sustainability booster in Europe

Article 8 of the European Energy Efficiency Directive (EED) requires the Member States to set up national incentives to assist SMEs to undertake energy audits. Since SMEs account for 99.98% of European enterprises and are responsible for approximately 13% of total energy demand, it is clear that SMEs have enormous potential to save energy and contribute towards the ability of the EU 28 to achieve their collective targets under the EED of a 32.5% improvement in energy efficiency by 2030. To date, little of this potential has been realised with studies estimating that only 25% of SMEs in Europe have undertaken an energy audit and a range of studies citing barriers that include lack of time, resource, in-house expertise, finance and the low priority nature of energy efficiency compared to other business needs. Article 8 also requires large enterprises to undertake energy audits every 4 years yet a recent study suggests that only 11% of large enterprises undertaking an audit intend to implement any of its recommendations, and 2 in 5 businesses cite lack of funding or finance as a reason for inaction. It is against this background that the challenges for the SPEEDIER project are set.

 Horizon 2020
European Union Funding

SPEEDIER holds the webinar *Towards a decarbonized Europe: Increasing energy efficiency in SMEs for a clean energy transition* together with related initiatives as part of the European Sustainable Energy Week extended programme

- The session aims at providing SMEs and relevant stakeholders with real practical examples and guidelines on how to enable the implementation of energy efficiency solutions to facilitate the energy transition.
- The online workshop will be hosted on October 19 from 9 to 10:30 (CEST) by the DEESME, E2DRIVER, ICEE, INNOVEAS, SMEPOWER, SPEEDIER, and Triple-A projects.

Cork (Ireland), October 14, 2021. **SPEEDIER** (SME Program for Energy Efficiency through Delivery and Implementation of EneRgy Audits) will hold the online session *Increasing energy efficiency in SMEs for a clean energy transition*, hosted on October 19 from 9 to 10:30 (CEST), together with the DEESME, E2DRIVER, ICEE, INNOVEAS, SMEPOWER, and Triple-A projects.

Building on the results of these seven EU-funded projects, this interactive session will provide guidelines and good practices to implement energy efficiency solutions and to facilitate the energy transition. Attendees will hear about available services, tools and policies that can unlock considerable amounts of energy/cost savings and assist in achieving emission targets. This webinar focuses on three key aspects of energy efficiency improvements in SMEs around Europe:

1. Barriers and opportunities in implementing energy efficiency solutions,
2. Best practices and case studies, such as training, tools, services etc.,
3. Policies to enhance the implementation of energy efficiency measures in SMEs in the upcoming years.

SMEs account for 99.98% of European enterprises and are responsible for approximately 13% of total energy demand. SMEs have enormous potential to save energy and contribute towards

the ability of the EU 28 to achieve their collective targets under the Energy Efficiency Directive of a 32.5% improvement in energy efficiency by 2030. To date, little of this potential has been realised with studies estimating that only 25% of SMEs in Europe have undertaken an energy audit and a range of studies citing barriers that include lack of time, resources, in-house expertise, finance, and the low priority nature of energy efficiency compared to other business needs. It is against this background that the challenges for the DEESME, E2DRIVER, ICEE, INNOVEAS, SMEPOWER, and Triple-A projects are set.

Free registrations are available on:

https://us06web.zoom.us/webinar/register/WN_5tfrSsDTqKQzwXN7V8j

DEESME (2020-2023) will enable companies, especially small and medium enterprises (SMEs), to engage in the energy transition by taking profit of multiple benefits from energy management and energy audit approaches, as well as provide national authorities with guidelines and recommendations to strengthen their national schemes/policies.

E2DRIVER main goal is to train SMEs in the automotive sector on energy auditing and energy-saving measures for cost-effective energy efficiency improvements. To overcome the lack of knowledge, skills, and awareness prevalent in the industry, the project's integrative approach aims to boost capacity building programmes on energy auditing by establishing an innovative learning platform.

ICEE aims to facilitate Small and Medium Enterprises (SMEs) belonging to supply chains in the food and beverage sector to undertake energy efficiency measures after carrying out overall supply chain energy audits.

INNOVEAS aims to bring energy efficiency to SMEs of the Chemistry, Food and Construction sectors. The project conducted a large survey among European SMEs, and it is currently preparing practical training.

SMEPOWER Efficiency will ensure that barriers to energy efficiency projects are removed for the uptake of energy efficiency projects by decision triggering of the learning between energy professionals and decision-makers. SMEPOWER Efficiency trainees experts, SME consulting companies, financing entities and Energy Service Companies (ESCOs), relevant associations and especially industrial professional or paternal partners.

SPEEDIER is a highly innovative one-stop-shop solution that applies an integrated approach to energy management, providing information, advice, capacity building, energy auditing, financing, implementation of energy efficiency solutions, and monitoring of impacts.

Triple-A aims to assist financial institutions and project developers increase their deployment of capital in energy efficiency, making investments more transparent, predictable and attractive. The project started in September 2019, it has a duration of 30 months and is funded by the EU Horizon 2020 programme. Triple-A is implemented by a consortium of academic, research and industry partners from the Netherlands, Germany, Italy, Spain, Greece, Czech Republic, Lithuania and Bulgaria.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 847034

SPEEDIER to present its results in an online session

- SPEEDIER (SME Program for Energy Efficiency through Delivery and Implementation of EneRgy Audits) is a highly innovative one-stop-shop solution that applies an integrated approach to energy management, providing information, advice, capacity building, energy auditing, financing, implementation of energy efficiency solutions, and monitoring of impacts.
- On November 17 from 10 to 12:30 (CET), SPEEDIER will showcase, among other contents, its energy assessment support tool, best practices & standardisation documents, training for experts & SMEs.
- The related energy efficiency initiatives DEESME, E2DRIVER, ICCEE, INNOVEAS, SMEPOWER, and Triple-A will also be part of the event.

Cork (Ireland), October 26, 2021. **SPEEDIER** (SME Program for Energy Efficiency through Delivery and Implementation of EneRgy Audits) will hold an online session on November 17 to present its results, lessons learned, and conclusions.

For two and a half hours, from 10 to 12:30 CET, SPEEDIER will go through the materials developed during the research project duration: training modules, eLearning materials and capacity building app, financing options, best practices guidelines, energy assessment support tool, etc.

SPEEDIER has also collaborated closely with the related energy efficiency initiatives **DEESME**, **E2DRIVER**, **ICCEE**, **INNOVEAS**, **SMEPOWER**, and **Triple-A** and they will take an active role as well at the webinar.

Registrations for the free venue are opened at: <https://www.eventbrite.com/e/sme-program-for-energy-efficiency-speedier-service-final-event-tickets-172849616857>

Energy efficiency in SMEs as sustainability booster in Europe

Article 8 of the European Energy Efficiency Directive (EED) requires the Member States to set up national incentives to assist SMEs to undertake energy audits. Since SMEs account for 99.98% of European enterprises and are responsible for approximately 13% of total energy demand, SMEs have enormous potential to save energy and contribute towards the ability of the EU 28 to achieve their collective targets under the EED of a 32.5% improvement in energy efficiency by 2030. To date, little of this potential has been realised with studies estimating that only 25% of SMEs in Europe have undertaken an energy audit and a range of studies citing barriers that include lack of time, resources, in-house expertise, finance, and the low priority nature of energy efficiency compared to other business needs. Article 8 also requires large enterprises to undertake energy audits every 4 years, yet a recent study suggests that only 11% of large enterprises undertaking an audit intend to implement any of its recommendations, and 2 in 5 businesses cite lack of funding or finance as a reason for inaction. It is against this background that the challenges for the SPEEDIER project are set.

This project has received funding from
the European Union's Horizon 2020 research and
innovation programme under grant agreement No 847034

Figure 4: Seventh Press Release English

The total impacts for this type of communications reached 23 outlets in total, including media, consortium partners and related projects portals, as shown in Annex 1.

The concrete size of the audience reached is very difficult to measure as there are not common analytics for every media and in every pilot region. For those media that have those numbers available, we have included the figure under the link to the news in Annex 1.

2.1.3 Events organised

During the M25-M30 period of the SPEEDIER project, several engagement events were organised by the consortium.

Limerick Institute of Technology (LIT) engaged with 50 SMEs during several training days held as part as the **DigiEco** events at Ennis, Tipperary and Limerick, aiming to boost participants' digital skills in energy management, resources and emissions.

Horizon 2020
European Union Funding
for Research & Innovation

This project has received funding from
the European Union's Horizon 2020 research and
innovation programme under grant agreement No 847034

Likewise, SIE participated in the organisation of the second joint webinar with related initiatives (those are described as part of chapter 2.1.5) as part of the European Sustainable Energy Week ([EUSEW](#)) extended programme 2021. The session was recorded on [video](#) and uploaded to the project's YouTube channel, and the [session](#) was also made available on the website.

EVENT: Towards a decarbonised Europe

INCREASING ENERGY EFFICIENCY IN SMEs FOR A CLEAN ENERGY TRANSITION

19/10/2021
09:00 - 10:30 CEST
Online

Building on the results of 7 EU-funded projects, this interactive session will provide guidelines and good practice to implement energy efficiency solutions and facilitate the energy transition. SMEs have a high untapped energy saving potential which can be unlocked by overcoming structural, market and financial barriers. Hear about available services, tools and policies that can unlock considerable amounts of energy/cost savings and assist in achieving emission targets.

AGENDA

- 9.00-9.10 Welcome and challenges presentation
by Erudino Llano (Training expert at CIRCE foundation. Project Coordinator of E2DRIVER)
- 9.10-9.30 Engagement of stakeholders
Using stakeholder consultation approaches for increasing Energy Efficiency in SMEs, by Ivana Rogulj (Climate and Energy Expert at IEECP. Project Manager of DEESME and ICCEE)
- 9.30-9.50 Implementation of Energy Efficiency in SMEs
How to overcome the implementation barriers with communication, easy-to-manage and ready-to-use tools, best practices and trainings and more, by Mara Corbella (European Projects coordinator at IIPLE. Project Coordinator of INNOVEAS).
- 9.50-10.10 Policies related with Energy Efficiency in Europe focused on industry and SMEs and ways to improve it
How policies can drive the uptake of energy efficiency in SMEs by Padraig Lyons (Head of Group IERC, Project Coordinator of SPEEDIER)
- 10.10-10.30 Round table
Moderated by Prof. Grigoris Papagiannis at Aristotle University of Thessaloniki, Greece, coordinator of SMEPOWER)

Registration is free but compulsory, at the following link:
https://us06web.zoom.us/webinar/register/WN_5trFSrDtqKQqwhXN7V8jw

Figure 5: EUSEW event agenda

Additionally, as part of the activities contemplated in work package 6 (WP6), a SPEEDIER Experts and Trainers training session was organised by Technical Corporation of Andalusia (CTA in its Spanish acronym), widely advertised on the official social media networks of the

Horizon 2020
European Union Funding
for Research & Innovation

This project has received funding from
the European Union's Horizon 2020 research and
innovation programme under grant agreement No 847034

project, and by the project partners through their channels to different stakeholders. The training event attracted more than 50 participants. SIE supported as well on the visuals (flyers and agenda). The videos ([video 1](#) and [video 2](#)) of the session, as well as the final presentations were made available on the project website, on its different languages.

Presentations: [English](#), [Italian](#), [Romanian](#), and [Spanish](#).

2.1.4 Events attended

During M25-M30 of the project, IERC attended online World Sustainable Energy Days (WSED) to present a [poster](#) about SPEEDIER to external audiences.

As COVID-19 continued to affect the participation in physical events, partners have disseminated SPEEDIER through other channels, like the organisation of virtual meetings. For example, TFC Research and Innovation Limited (TFC) held meetings with [Codema](#), Dublin's Energy Agency; [CENER](#), Spanish Center for Renewable Energy, [Dekra](#) Industrial and Tipperary Energy Agency, the latter two being very active and engaging members of the SPEEDIER Advisory Board. They also used events such as the SEAI event on *Support Scheme for Energy Audits* to further the interest of SPEEDIER to the participating community.

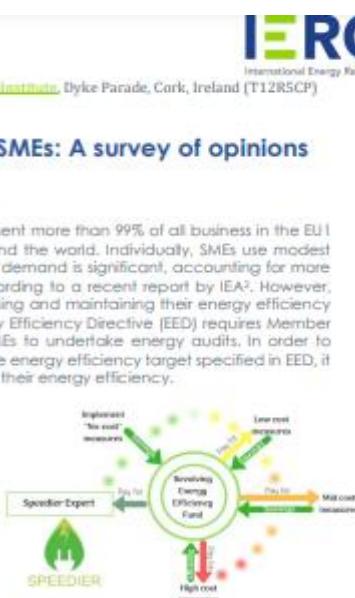

Barriers to Energy Efficiency in SMEs: A survey of opinions on energy auditing in SMEs

1. Introduction

Small and Medium-sized Enterprises (SMEs) represent more than 99% of all business in the EU¹ and are an important driver of economies around the world. Individually, SMEs use modest amounts of energy but collectively, their energy demand is significant, accounting for more than 13% of total energy demand globally according to a recent report by IEA². However, SMEs show poor performance in terms of increasing and maintaining their energy efficiency due to a range of barriers. Article 8 of the Energy Efficiency Directive (EED) requires Member States to set up national incentives to assist SMEs to undertake energy audits. In order to implement Article 8 of the EED and to achieve the energy efficiency target specified in EED, it is essential to provide support to SMEs to improve their energy efficiency.

SPEEDIER is a Horizon 2020 funded project, developing one-stop-shop solution for SMEs, providing outsourced energy management and capacity building activities. SPEEDIER will offer the SPEEDIER Service which will help SMEs by removing the hassle of energy management by offering a self-financing outsourced energy management service via SPEEDIER Experts, who takes the role of outsourced energy manager and guides SMEs through the energy audit and subsequent implementation of Energy Conservation Measures (ECMs).

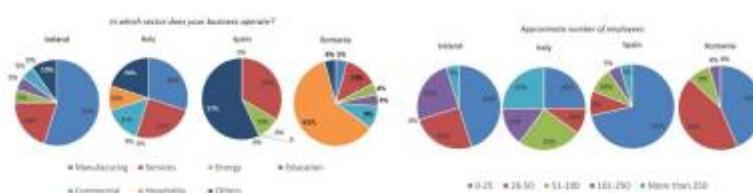

2. The online survey

In order to understand the market for energy audits in SMEs, including the drivers and barriers that influence the level of uptake of energy audits and implementation of recommended ECMS, an online survey was conducted by SPEEDIER, a Horizon 2020 project. The results of the survey facilitated the validation of the design concept behind SPEEDIER and provided insights on improvements to the project that would maximize the chances of successful project implementation in the chosen pilot countries (Ireland, Italy, Spain, Romania). The survey was conducted using the online platform 'Google Forms' and 84 SMEs (20, 20, 21 and 23 from Ireland, Italy, Spain and Romania respectively) participated in the survey.

3. Survey Questions and Results

Based on nature of questions sub categories of the survey questions were created.

3.1 Business sector, Size, and building

¹ https://ec.europa.eu/growth/smes_en

² As per IEA report published in 2015 "Accelerating Energy Efficiency in Small and Medium-sized Enterprises".

Figure 10: SPEEDIER at WSED 2021

Horizon 2020
European Union Funding
for Research & Innovation

This project has received funding from
the European Union's Horizon 2020 research and
innovation programme under grant agreement No 847034

2.1.5 Interaction with other EU projects

Following the actions carried out in previous periods, SPEEDIER has continued to engage with similar projects and initiatives (more than 6 online meetings have been held). Thus, as explained in the previous section, a joint workshop was organised, as part of the EUSEW extended programme by the [DEESME](#), [E2DRIVER](#), [ICEEE](#), [Innoveas](#), [SMEmPOWER efficiency](#), [SPEEDIER](#) and [Triple A](#) projects.

Figure 11: Example of collaboration in the dissemination of related projects' contents

Additionally, TFC sought collaboration as well with the [pisCES](#), [BIMCert](#), and [ePanacea](#) as well as [ERADATA](#) and formulated the development of the Energy Efficiency – Community of Users with the [Technology University of Munich](#), CENER, Dekra and the SPEEDIER partners [Manage Energy](#). The aim of the Energy Efficiency Community of Users (EE CoU) is to facilitate interaction across the research community for the energy efficiency sector and to engage with the sector at levels from policy making through to implementation, training and awareness in support of the realisation of a low-carbon, clean and energy efficient world.

2.2 Online actions

2.2.1 Website

Since the official release of the website on M2, SPEEDIER partners have contributed widely to its update by providing information on milestones, giving interviews, consolidating dissemination materials, etc.

Apart from the videos and presentations already showcased before, the website has gone through several updates to capture better the project progress. Thus:

On the home page, the second video showcasing the project main take aways replaced the first video:

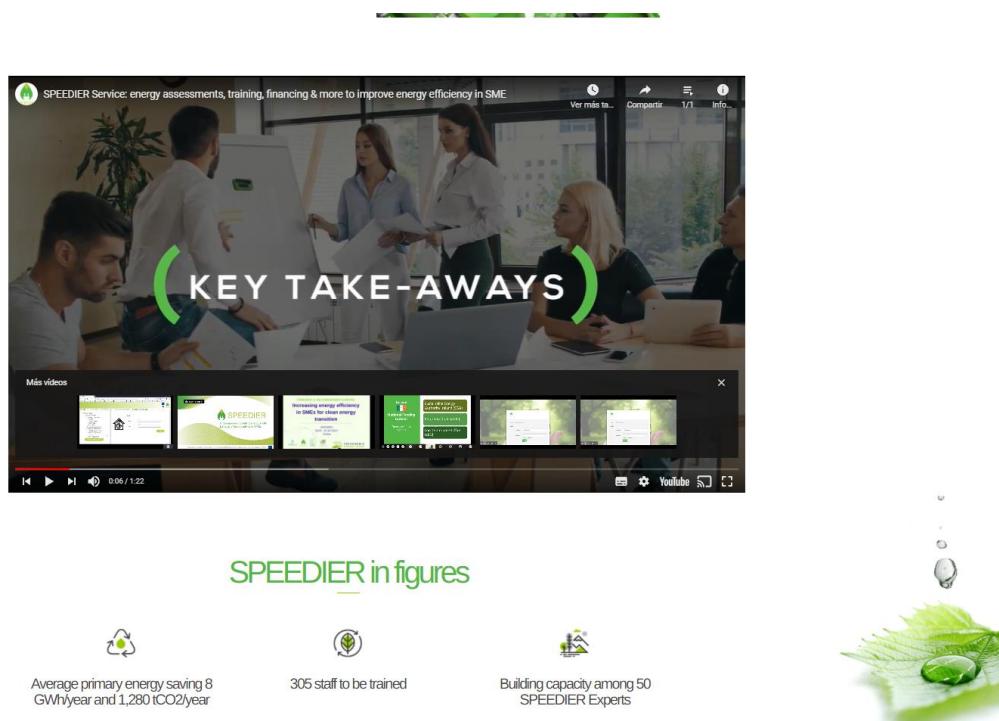

Figure 12: Second SPEEDIER video embedded on the homesite

Likewise, the training section was refurbished to give it a new lay out and include the eLearning modules and latest workshops:

Horizon 2020
European Union Funding
for Research & Innovation

This project has received funding from
the European Union's Horizon 2020 research and
innovation programme under grant agreement No 847034

OVERVIEW

The Capacity Building Programme of the SPEEDIER Project aims to delivering general energy awareness training to staff of participating organisations, to senior managers and decision makers and to the SPEEDIER Experts. It consists of different events, tutorials, videos and presentations that are gathered together as online materials to cover topics of interest from the energy efficiency field.

Horizon 2020
European Union Funding
for Research & Innovation

This project has received funding from
the European Union's Horizon 2020 research and
innovation programme under grant agreement No 847034

Likewise, SPEEDIER has uploaded the following public deliverables, which sum up to the ones already available from the previous period:

- [D4.4 Final energy auditing tool for use by SPEEDIER Experts](#)
- [D4.4 Final training & capacity building materials for general staff and decision makers](#)
- [D4.6 Revised training content for SPEEDIER Experts and Trainers](#)
- [D4.8 Final e-learning materials, mobile app, case studies, videos, online resources](#)
- [D8.8 Second SPEEDIER video](#)

Deliverables

D2.1 Review of existing energy auditing schemes, incentives, policies and projects (available)
D2.2 Register SMEs and large enterprises in each pilot country participating in SPEEDIER (available)
D2.3 Report on findings from surveys of businesses participating in SPEEDIER (available)
D2.4 Report summarising findings from focus groups of key stakeholders in the SPEEDIER process (available)
D2.5 Recommendations for the SPEEDIER Service – executive summary (available)
D3.1 Report on the characterisation of SMEs and opportunities (available)
D3.3 Methodology, criteria evaluation system to find opportunities for energy and cost savings (available)
D3.4 Report outlining the application of the characterisation process to the selected pilot sites (available)
D4.1 SPEEDIER Service definitions for implementation (available)
D4.2 Final energy auditing tool for use by SPEEDIER Experts (available)
D4.3 Draft training and capacity building materials for general staff & decision makers (available)
D4.4 Revised training and capacity building materials for general staff & decision makers (available)
D4.5 Draft training content for SPEEDIER Experts and SPEEDIER Trainers (available)
D4.6 Revised training content for SPEEDIER Experts and SPEEDIER Trainers (available)
D4.7 Report on SPEEDIER financing and contract options (available)
D4.8 Final e-learning materials, mobile app, case studies, videos, on-line resources for (WP5, WP6) and Dissemination phases (WP8) (available)
D5.1 Delivery of 4 x Engagement events, one in each pilot region (available)
D5.3 Summary report on first & second SPEEDIER Service pilots (not available yet)
D5.4 Report on the results of the evaluation of the SPEEDIER pilots (not available yet)
D6.1 Evaluation report on first pilot of SPEEDIER Experts and Trainers training (available)
D6.2 Evaluation report on final SPEEDIER Experts and Trainers training (not available yet)
D6.3 Summary of capacity building actions and "train-the-trainer" plan (not available yet)
D6.4 Train-the-trainers 'Education Kit' (not available yet)
D7.1 SPEEDIER Best Practices Guidelines for SMEs and large enterprises in EU (not available yet)
D7.2 Roadmap for SPEEDIER to contribute to achieving the EU's objectives (available)
D7.3 Action plans showing how SPEEDIER can assist in achieving EU wide policy targets (not available yet)
D7.4 Technical Report on SPEEDIER replication potential across EU Member States (not available yet)
D8.1 Project Website (available)
D8.2 First Dissemination and Communication Plan (available)
D8.3 Second Dissemination and Communication Plan (available)
D8.4 Third Dissemination and Communication Plan (available)
D8.5 Final Dissemination and Communication Plan (not available yet)
D8.6 Programme newsletters (not available yet)
D8.7 First SPEEDIER video to engage target audience (available)
D8.8 Second SPEEDIER video (available)
D8.9 Final project conference (not available yet)
D9.1 Quality Assurance Plan (available)
D9.2 Impact Analysis (available)
D9.4 Final impact report (not available yet)
D9.7 Draft CWA project plan (available)
D9.8 Draft CWA based on the SPEEDIER Service (not available yet)

Figure 17: Deliverable Section

In the M25-M30 period of the project, SPEEDIER has gained 595unique visitors on its website, with an average session duration of 6 minutes 56 seconds. 11,038 unique page views in total.

Horizon 2020
European Union Funding
for Research & Innovation

This project has received funding from
the European Union's Horizon 2020 research and
innovation programme under grant agreement No 847034

Summing up results from the beginning of the project, SPEEDIER has obtained 4,355 users, 29,000 page views and an average session of 3 minutes 45 seconds.

At the beginning of the project, a KPI of 4,000 visitors and 1,000 clicks was established. The click rate was already achieved (pages view) during the previous period, and, in this final period, SPEEDIER achieved too the number of visitors.

A common session duration is usually between 1 and 2 minutes, the average session of almost 4 minutes achieved indicates high visitor engagement and interest in the project.

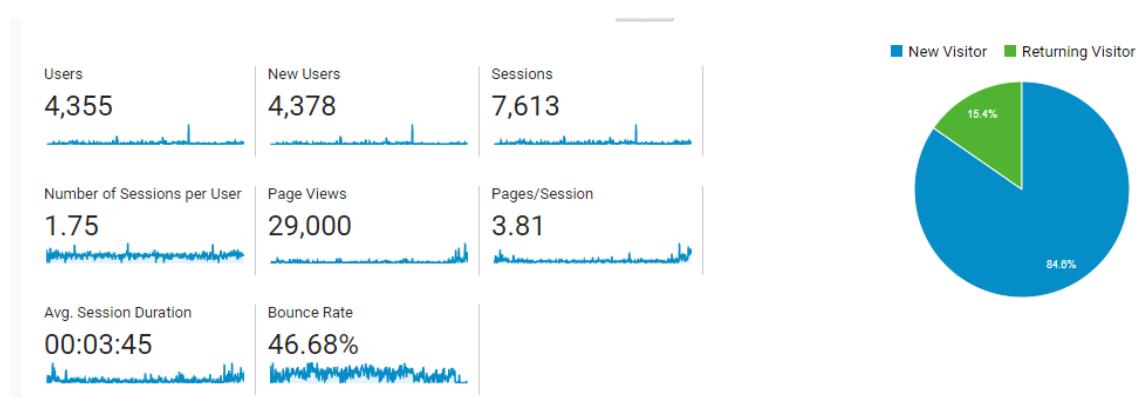

Figure 19: Google Analytics for SPEEDIER Website

2.2.2 Newsletter

As mentioned in the Grant Agreement, it was expected that newsletters would be released biannually.

Due to the impossibility to participate in physical events, SPEEDIER has reinforced this communication channel, and released 9 Newsletters in total by M30 + 2 informative mailing about project's events. Two of them in this period of analysis.

Issue number 8 announced the upcoming events, both the EUSEW conference, as well as the final event. It also informed about the collaboration agreement established with the Cube in Ireland to continue providing the SPEEDIER Service after project as well as the project impact achieved to date. From its part, the latest SPEEDIER Newsletter included information on the new training section of the website and capacity building materials available, including the state-of-the-art apps and share the latest SPEEDIER webinar sessions.

As of M30, the Newsletter has 531 subscribers and 1,047 readers altogether among the nine of them, and the two Newsletters that served as invitation for the training event. An average of 95 readers per Newsletter. 450 readers were expected by the end of the project, thus the KPI is well achieved.

SPEEDIER

OCTOBER 2021

In this issue....

Capacity building. Padraig O'Reilly (UT) Nicola di Giusti (POL)
11:50 - 12:00 SPEEDIER replication & business models Ruth Aguirre (ERC) Carla Serradell (Sustainable Innovations)	12:00 - 12:10 SPEEDIER - Best practices & standardisation Tom Flynn (TFC)	12:25 - 12:30 Wrap up and end of event Mariana Fernandez (Sustainable Innovations)

Figure 20: Eighth Newsletter (M28)

Horizon 2020
European Union Funding
for Research & Innovation

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 847034

2.2.3 Social media

The first social media channels ([LinkedIn](#) and [Twitter](#)) were put in place by SIE in M1, while the [YouTube](#) platform was established once the first official video of the project was released (M5).

LinkedIn

SPEEDIER presence in LinkedIn has reached 427 followers by M30 after 128 updates (posts).

The engagement rate of this platform (number of interactions with post -likes, comments, shares) has reached 8.34% (more than 3% is usually considered excellent performance).

The number of impressions (views) has grown during the M25-M30 period, reaching 15,433 views by November 2021. Summing up the figures with those obtained in the previous months, which gives us a total of 62,417.

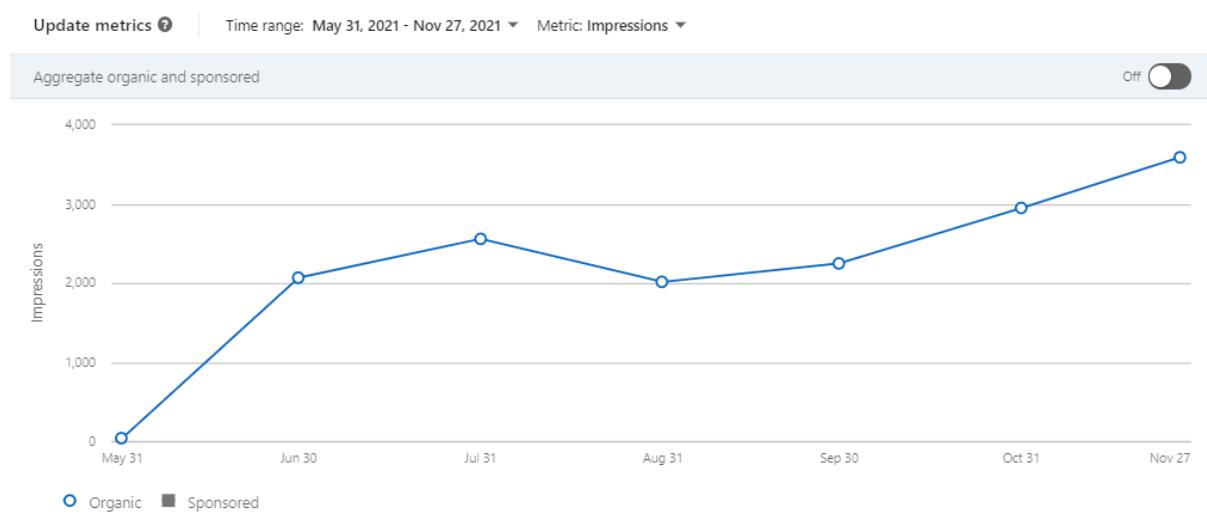

Figure 21: Number of Impressions for SPEEDIER in LinkedIn

Twitter

As of November 2021, SPEEDIER has 195 followers on this social media channel after 382 tweets. The contents on the profile have generated 31,700 from M25 until M30*. The current engagement rate for Twitter is 2.9% (over 0.5% is considered good performance). Some partners, as well as the abovementioned related projects, have been very active and supportive in this area. In summary, a total of 196,100 has been reached in this social media network by M30.

*The difference between the analytics of LinkedIn and Twitter remains mainly in the nature of each of them. All the professional contacts are more frequently found on LinkedIn, while Twitter is usually more oriented to a personal use. The interest to be on Twitter, although it frequently results in poor performance compared to LinkedIn, is the number of views that is usually higher than on LinkedIn.

Your Tweets earned **16.0K impressions** over this **90 day** period

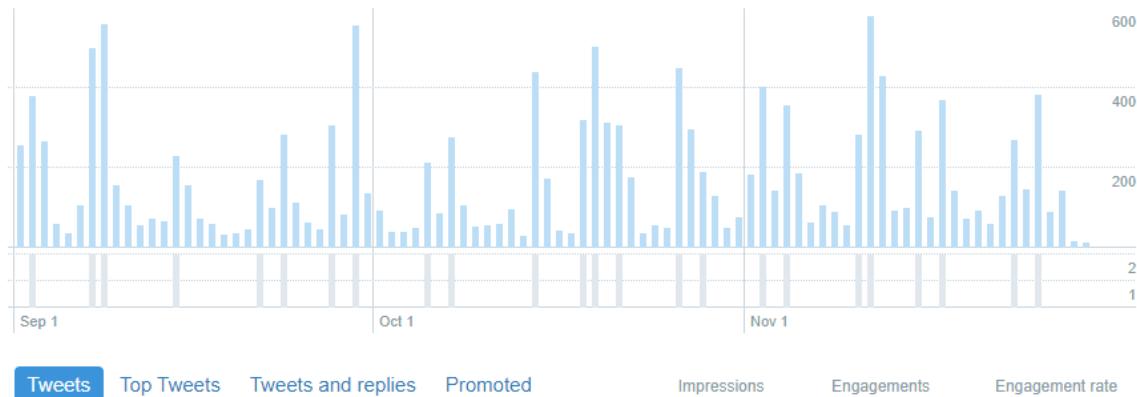

Figure 22: Number of Impression for SPEEDIER on Twitter

YouTube

At least two videos were expected to be produced along the project life.

To date, the channel has 15 subscribers and SPEEDIER has made 27 videos public, 13 items in this period of analysis: the training sessions for energy experts and staff members ([day 1](#) and [day 2](#)), the second corporate [video](#), the EUSEW [webinar](#) as well as the final SPEEDIER [event](#). Likewise, all the modules for the Irish sessions were recorded in 6 different [videos](#). In addition, TFC and LIT also produced short videos to further interest in the aims and outcomes of SPEEDIER. From its part, CTA worked on two different videos ([1,2](#)) as promotional materials for SPEEDIER.

All videos have received 1,059 views to date.

3 Dissemination

As stated on the Grant Agreement Article 29 “Unless it goes against their legitimate interests, each beneficiary must — as soon as possible — ‘disseminate’ its results by disclosing them to the public by appropriate means (other than those resulting from protecting or exploiting the results), including in scientific publications (in any medium).”

In compliance with this article, our partners have actively contributed to disseminating the SPEEDIER project from the very beginning by different means: social media posts, attendance at conferences and shows, emailing campaigns, newsletters, press releases, etc. to good effect.

SPEEDIER LinkedIn posts have been shared 117 times in this period (572 during the project life) and the partners were very supportive in this area. Likewise, consortium members have made 88 tweets during M25-M30 (352 during the project life) about SPEEDIER and contributed to retweeting 186 times (769 in total) to the content shared in the official social media channels.

Some partners have accounts on other media channels (Facebook and Instagram) and they have disseminated the project widely as well over there.

During this period, IERC presented in June 2021 the [poster Barriers to Energy Efficiency in SMEs. A survey of opinions on energy auditing in SMEs](#) as part of World Sustainable Energy days conference.

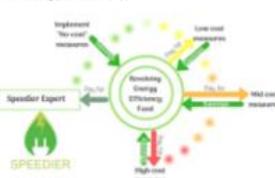

Barriers to Energy Efficiency in SMEs: A survey of opinions on energy auditing in SMEs

1. Introduction

Small and Medium-sized Enterprises (SMEs) represent more than 99% of all business in the EU and are an important driver of economies around the world. Individually, SMEs use modest amounts of energy but collectively, their energy demand is significant, accounting for more than 13% of total energy demand globally according to a recent report by IEA⁷. However, SMEs show poor performance in terms of increasing and maintaining their energy efficiency due to a range of barriers. Article 8 of the Energy Efficiency Directive (EED) requires Member States to set up national incentives to assist SMEs to undertake energy audits. In order to implement Article 8 of the EED and to achieve the energy efficiency target specified in EED, it is essential to provide support to SMEs to improve their energy efficiency.

SPEEDIER is a Horizon 2020 funded project, developing one-stop-shop solution for SMEs, providing outsourced energy management and capacity building activities. SPEEDIER will offer the SPEEDIER Service which will help SMEs by removing the hassle of energy management by offering a self-financing outsourced energy management service via SPEEDIER Experts, who takes the role of outsourced energy manager and guides SMEs through the energy audit and subsequent implementation of Energy Conservation Measures (ECMs).

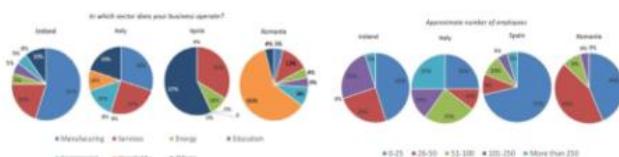

2. The online survey

In order to understand the market for energy audits in SMEs, including the drivers and barriers that influence the level of uptake of energy audits and implementation of recommended ECMS, an online survey was conducted by SPEEDIER, a Horizon 2020 project. The results of the survey facilitated the validation of the design concept behind SPEEDIER and provided insights on improvements to the project that would maximize the chances of successful project implementation in the chosen pilot countries (Ireland, Italy, Spain, Romania). The survey was conducted using the online platform 'Google Forms' and 84 SMEs (20, 20, 21 and 23 from Ireland, Italy, Spain and Romania respectively) participated in the survey.

3. Survey Questions and Results

Based on nature of questions sub categories of the survey questions were created.

3.1 Business sector, Size, and building

¹ https://ec.europa.eu/growth/smes_en
² As per IEA report published in 2015 'Accelerating Energy Efficiency in Small and Medium-sized Enterprises'.

Figure 23: Poster Barriers to Energy Efficiency in SMEs. A survey of opinions on energy auditing in SMEs

Likewise, IERC coordinated a joint paper with related initiatives entitled *Challenges and Opportunities for Improving Energy Efficiency in SMEs* (to be published in December 2021)

From its part, TFC, together with ITEC, led the development of the [article](#) *SPEEDIER engagement for the SME community* while SIE wrote the article *La formación, el desarrollo de políticas corporativas y las auditorías energéticas, claves para el éxito de las medidas de eficiencia energética en pymes* (Training, development of corporate policies and energy assessment, key to a successful implementation of energy efficiency in SMEs) for the Spanish magazine [El instalador](#)).

Moreover, to increase SPEEDIER visibility worldwide, SIE submitted the candidacy of SPEEDIER to the [.eu Website Awards](#), showcased SPEEDIER during [Macaronight European Researchers' Night](#) and on [Enlit's website](#) and presented a virtual booth and a [poster](#) during Sustainable Places conference.

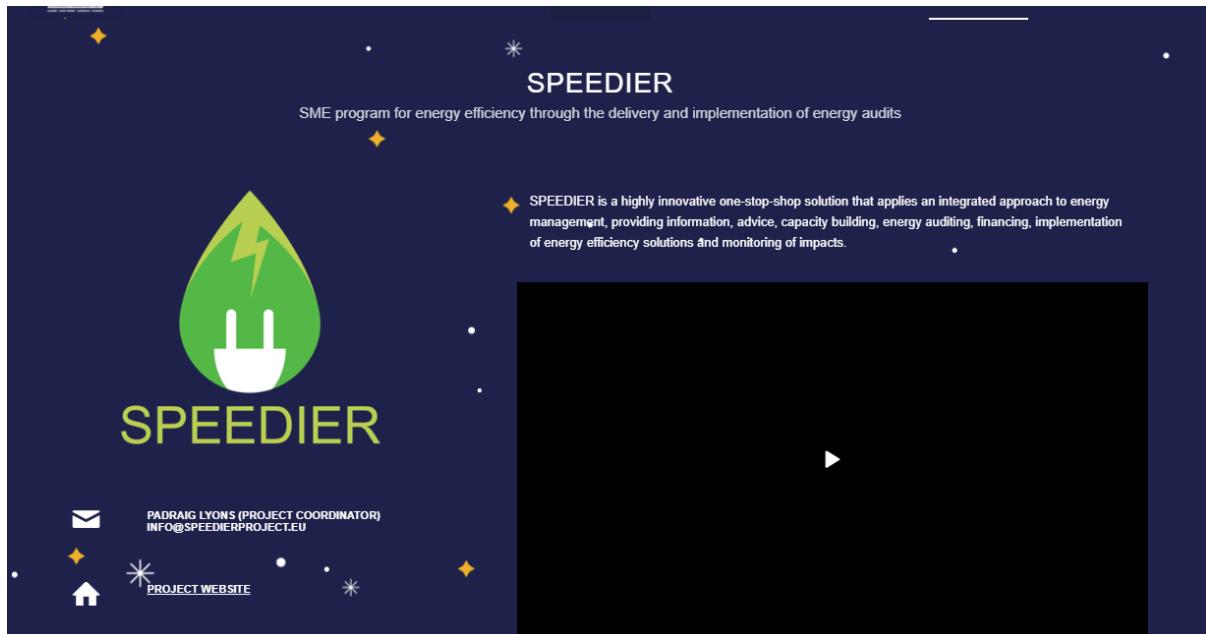

Figure 24: SPEEDIER at Macaronight's

A relevant part of the dissemination has been the continuous feedback with SPEEDIER's Advisory Board, led by TFC. The group has supported the project development and provided feedback on the materials produced. A final [meeting](#) was held on the 29th of October 2021 with much positive feedback received on the outcome of the project and its' results.

All this information can be found in more detail in the dissemination tables included in Annex 2.

Horizon 2020
European Union Funding
for Research & Innovation

This project has received funding from
the European Union's Horizon 2020 research and
innovation programme under grant agreement No 847034

4 Action Plan M31-M55

SPEEDIER partners are committed to continue disseminating the project results and goals at least two years after the project ends, so a wider impact can be reached.

Thus, the website and corporate channels will continue to be the main repository of documentation and the access to the key innovations developed.

Numerous reports are due for M30 and their conclusions cannot be included on this deliverable due to time constraints, nevertheless, they will be communicated and disseminated on the corporate channels as follows:

During December 2021 all due public deliverables will be uploaded to the website to its dedicated [section](#). On December 9, the social media channels will communicate the results on the pilots and link to the public report on the website. On December 14, the evaluation report on final SPEEDIER Experts and Trainers training will be posted. On December 21, a summary of capacity building actions and “train-the-trainer” plan will be communicated. On December 28, the education kit will be shared with stakeholders. On January 4, the best practice guidelines will be made available on the social media channels. On January 11, visitors will be able to access the SPEEDIER roadmap. On January 18, SPEEDIER will post about the reference document for organisations showing the most appropriate ways to replicate the SPEEDIER Service. On January 25 the final communication plan will be shared. On February 1, the monitoring of the SPEEDIER service will be made available. Finally, the standardisation best practice guide will be communicated on February 8.

This summary above is just an example on the strategy that will be followed to raise awareness on the SPEEDIER results after the project ends. For at least two years, more impacts and results will be communicated.

IERC will also be responsible to produce a paper addressing two case study from Irish pilot to show the practical implementation of ring-fencing-mechanism. The paper will present the concept of ring-fencing mechanism, description of site/facility and proposed list of no-cost, low-cost, mid-cost and high-cost measures. The paper will also present agreed yearly implementation plan of all the suggested ECMs along with energy saving, cost saving and carbon saving. From its part, Polimi is also working on a paper to showcase the importance of training in energy efficiency to achieve the goals of Article 8 of the EED.
