

SPEEDIER

SME Program for Energy Efficiency through Delivery and Implementation of EneRgy Audits

D8.9 –Final Project Conference

Lead Contractor: Sustainable Innovations (SIE)

**Author(s): Mariana Fernández, Head of Communications
at SIE**

Date: 30th November 2021

This document is the Speedier Final Conference report (contract no. 847034) corresponding to D8.9 (M30) led by SUSTAINABLE INNOVATIONS EUROPE (SIE).

Project details			
Project acronym	SPEEDIER	Start / Duration	June 2019/ 30 Months
Topic	LC-SC3-EE-8-2018-2019 Capacity Building programmes to support implementation of energy audits	Call identifier	H2020-LC-SC3-EE-2018
Type of Action	CSA	Coordinator	Padraig Lyons (IERC)
Contact persons	Mariana Fernández marianafernandez@sustainableinnovations.eu Padraig.lyons@ierc.ie		
Website	www.speedierproject.eu		

Deliverable details			
Number	D8.9		
Title	Final Project Conference		
Work Package	8		
Dissemination level	PU	Nature	PUBLIC
Due date (M)	30 Nov 2021	Submission date (M)	30-Nov-2021
Deliverable responsible	Mariana Fernández marianafernandez@sustainableinnovations.eu		

Deliverable Contributors		
Deliverable leader	Name	Mariana Fernández
	Organisation	Sustainable Innovations (SIE)
	Role/Title	Communications Manager
	Email	marianafernandez@sustainableinnovations.eu
Contributing Author	Name	Jesús Serrano
	Organisation	Sustainable Innovations (SIE)
	Role/Title	Deputy General Manager
	Email	Jesuserrano@sustainableinnovations.eu
	Name	Tom Flynn

Review and quality approval	Organisation	TFC Research and Innovation Limited
	Role/Title	Quality Manager/WP9 Leader
	Email	t.flynn@tfcengage.com
Final review and submission	Name	Padraig Lyons
	Organisation	IERC
	Role/Title	Senior Research Engineer
	Email	padraig.lyons@ierc.ie

Document History			
Date	Version	Name	Changes
22/10/2021	0.1	Mariana Fernández	First document version.
19/11/2021	0.2	Jesús Serrano	Internal quality review.
22/11/2021	0.3	Mariana Fernández	Implementation of changes.
24/11/2021	0.4	Tom Flynn	Review and QA'd.
30/11/2021	1.0	Padraig Lyons	Approved for EC portal submission.

2.9 Feedback	17
3 ANNEX 1: SPEEDIER FINAL EVENT PRESENTATIONS	18

1 Executive Summary

The primary aim of SPEEDIER is to provide a self-financing outsourced energy management service to SMEs, by outsourcing the role of energy manager to SPEEDIER Experts and, by that, allowing to access the expertise needed at the required time, leading to greater uptake of energy audits and implementation of energy efficiency measures.

This document corresponds to the **Final Conference report** deliverable, describing the activities undertaken to organise SPEEDIER's final event in an online version.

1.1 Context of WP8

The objectives of WP8 are to:

1. Enable future exploitation of the results to their full potential by disseminating and communicating them to the relevant stakeholders who will use and implement them;
2. Ensure that the findings of the programme are widely communicated to the public in general;
3. Support the market uptake of research and innovation results;
4. Prepare the corporate image and a set of materials for the promotion and comprehensive dissemination of SPEEDIER Service and its outcomes.

1.2 Objective of Task 8.3

As outlined in Task 8.3, the project partners were expected to participate in relevant forums, fairs, and events to further boost the dissemination of programme outputs and opportunities offered by cross sectoral and to host and participate in a final conference to be held towards the end of the programme (M28), where the project team will present the SPEEDIER project outcomes and the future steps towards the use of SPEEDIER across the European Union. This final conference took place in M30 in an online version. Although it was originally thought to be a face-to-face event, the consortium partners decided to go with an online venue due to the uncertainty of the COVID-19 situation.

1.3 Objective of Deliverable D8.9

Deliverable D8.9 corresponding to the final conference report was aimed at summarising the event organisation, development, and KPIs obtained during the event. The final conference addressed a good number of stakeholders including policymakers, academia, industry, SMEs, etc, with the aim to raise awareness on how SPEEDIER can help to achieve Article 8 of the EED Directive goals in terms of energy efficiency.

2 Introduction

Sustainable Innovations Europe (SIE) led the organisation of the final conference with contribution with the rest of the consortium partners, as well as the related project initiatives SPEEDIER has been working with to boost energy efficiency among SMEs: DEESME, E2DRIVER, ICCEE, Innoveas, SMEmPower Efficiency and Triple A.

The final conference was originally expected to be held in person at EU level, and thus, Brussels was the planned physical location. However, due to the still ongoing COVID-19 restriction measures, it was finally decided that an online event will be better option for the final conference.

After a partner vote, it was decided that November 17th at 10:00 CET was a good timeslot to organise the venue. The event lasted for two and a half hours and covered the most relevant achievements SPEEDIER has obtained after 30 months of research.

The session was coordinated by SIE, and it counted with the participation of all the project partners, who actively participated with a presentation of the work each of them performed during the project execution. The abovementioned projects were also present at the event where they disseminated their projects main goals and challenges.

2.1 Registration platform

SIE used Eventbrite as platform for interested participants to register. Over there, information on the date, hours, number of tickets available and purpose of the session was showcased. The possibility to register was also given to participants.

After registering, participants received an email confirming they are correctly subscribed for the event, and they were also encouraged to visit and follow the project's corporate channels.

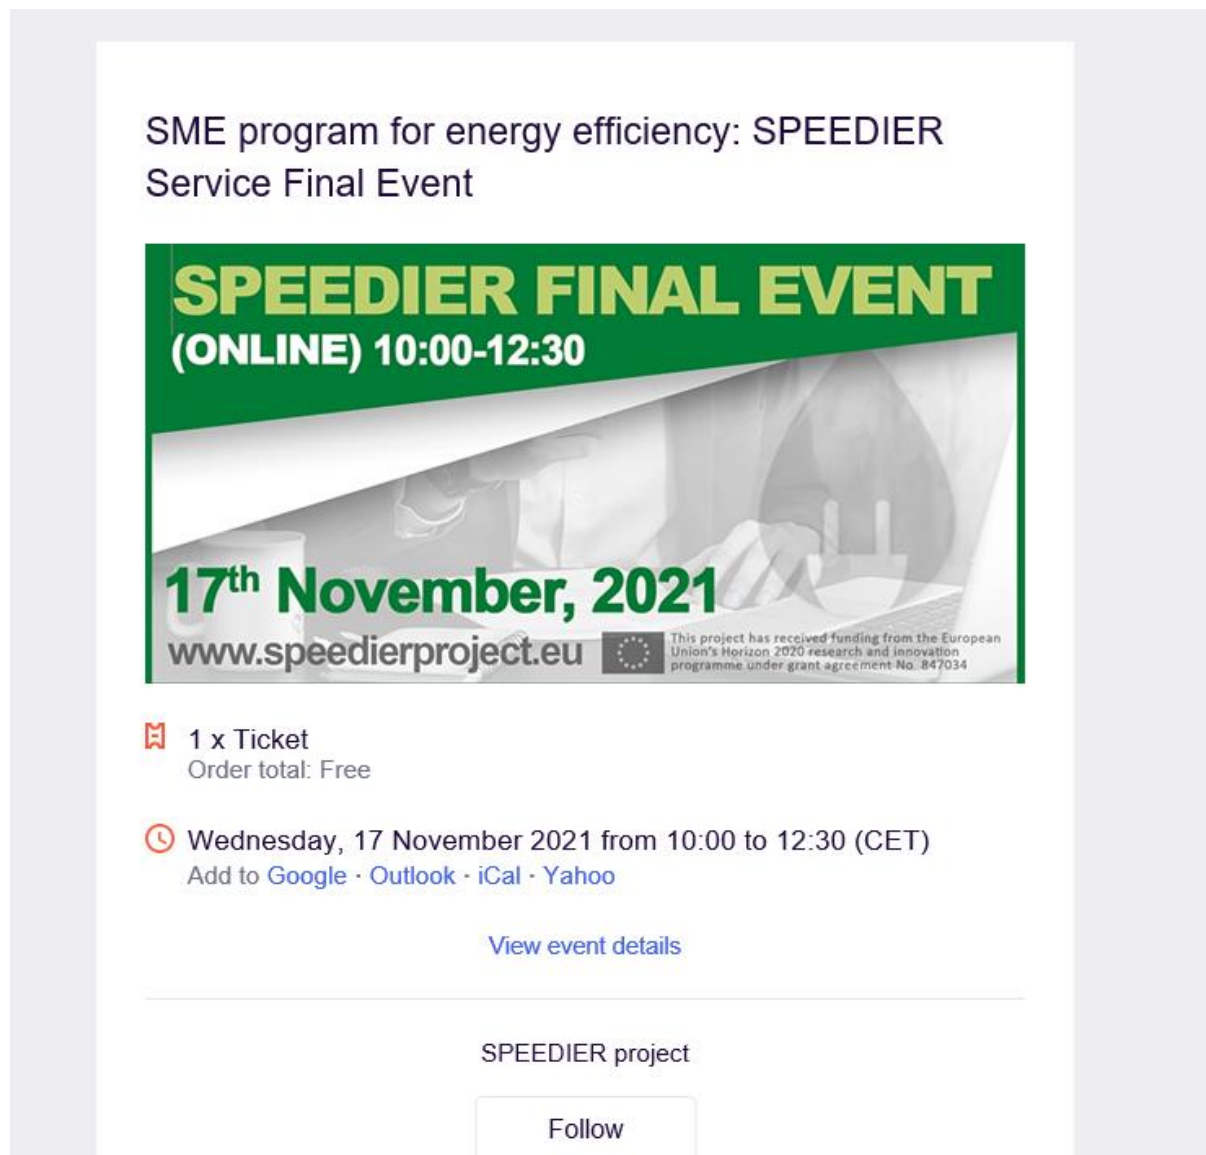

Figure 1: Email confirmation after registering to SPEEDIER Final event

2.2 Tool

The tool used for the online session was Zoom webinars. The reason behind using this site was its user-friendly platform, the flexibility to showcase contents and polls, as well as the analytics it offers for number of participants.

SIE was in charge of providing the [link](#) to the connection to the registered participants on Eventbrite.

2.3 Flyer and agenda

The final conference had a very ambitious KPI in terms of attendance (100 people). That's why SIE, in collaboration with the SPEEDIER partners, worked hard to promote the event, one and a half months in advance of the date for the event.

For this promotion, a flyer as well as the event agenda was prepared and distributed among the consortium who disseminated widely through their stakeholders by email, social media posts, and publications on their websites.

SPEEDIER FINAL EVENT (ONLINE)
17th November, 2021
10:00-12:30

17TH NOVEMBER 2021

10:00 - 10:05 Welcome and introduction to the webinar Mariana Fernández (Sustainable Innovations)	10:10 - 10:15 Overview of SPEEDIER Padraig Lyons (IERC)	10:15 - 10:45 Related initiatives (Deesma, E2driver, Ioccc, Innovass, Smempower Efficiency, Triple-A)
11:00 - 11:20 SPEEDIER service: Implementation in pilot regions Romania: Ion Dogeanu (AEEPIM) Ireland: Padraic O'Reilly (LIT) Italy: Nicola de Gaudi (POL) Spain: Eys Marín (PCT Carluja)	11:20 - 11:30 SPEEDIER assessment & training apps Training: Ruchi Agrawal (IERC) Assessment: Diana Romeu (ITEC)	11:40 - 11:50 Training for experts & SMEs. Capacity building. Padraic O'Reilly (LIT) Nicola de Gaudi (POL)
11:50 - 12:00 SPEEDIER replication & business models Ruchi Agrawal (IERC) Carla Sebastiani (Sustainable Innovations)	12:00 - 12:10 SPEEDIER - Best practices & standardisation Tom Flynn (TFC)	12:25 - 12:30 Wrap up and end of event Mariana Fernández (Sustainable Innovations)

 This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 847034
 

Figure 2 & 3: Final event flyer and agenda

The session was moderated by SIE, who opened and introduced the event, presented each of the speakers, showed the presentation slides through Zoom, prepared the poll questions, and closed the session.

2.4 Event dissemination

Tool	Communication and dissemination measures / activities	Target groups
Invitation emails	Invitations were sent out to the SPEEDIER consortium for them to distribute it among their contacts.	Local authorities, funding bodies, policy makers, industry, media, SMEs, energy experts and other energy efficiency-related national or EU projects.
Newsletter	Two newsletters were released containing information on the SPEEDIER Final event. The first one invited stakeholders to join the online session, while the second one informed about the results of the event.	
Press release	A press release was prepared, released, and uploaded to the website to inform general and trade media about the venue.	
Social media announcements	The event was widely spread through SPEEDIER's LinkedIn and Twitter social media channels, as well as through the consortium partners corporate and personnel channels. SPEEDIER related projects also contributed to the dissemination.	
Website pop-up	A pop-up was installed on the project website's homepage, announcing the conference, and inviting people to register.	
Website news	A blog post was published announcing the details of the online conference (date, time, and agenda) on the SPEEDIER website under the events section. SPEEDIER related projects also uploaded information on their websites. More information can be found on the Final Communication and Dissemination Plan.	
Follow up email	After the event, a follow up email was sent to registered participants sending them the	

	video of the session and inviting them to follow the corporate channels for more information.	
--	---	--

Table 4: Dissemination channels

To guarantee the event success, SIE prepared a comprehensive strategy to disseminate the event. After working on the flyer and event layout, SIE prepared an email and shared it with the consortium partners for distribution among their contacts. In parallel, a campaign on the website and social media channels followed. A pop-up was included with the information of the event and registration link, so every website visitor could directly access the information there. All details were also included on the [event](#) section of the website. Some related projects posted information on the event as well on their social media channels and website ([1](#), [2](#)).

On SPEEDIER social media channels, several posts ([1](#), [2](#), [3](#), [4](#), [5](#), [6](#)) were made to announce the event, and a specific event [page](#) was created on LinkedIn for greater impact.

Two newsletters ([1](#), [2](#)) were released containing information on the SPEEDIER Final event. The first one invited stakeholders to join the online session, while the second one informed about the results of the venue.

Once the recorded session was available, it was shared through a follow up email, as well as on the website and social media channels.

Likewise, a [press release](#) was launched to more than 200 media outlets to inform them about the event. This press release was written in English and translated into the three pilot languages ([Italian](#), [Romanian](#) and [Spanish](#)) and uploaded to the website. The event was also promoted through the [Build Up platform](#).

SPEEDIER to present its results in an online session

- **SPEEDIER (SME Program for Energy Efficiency through Delivery and Implementation of EnERgy Audits)** is a highly innovative one-stop-shop solution that applies an integrated approach to energy management, providing information, advice, capacity building, energy auditing, financing, implementation of energy efficiency solutions, and monitoring of impacts.
- On November 17 from 10 to 12:30 (CET), **SPEEDIER** will showcase, among other contents, its energy assessment support tool, best practices & standardisation documents, training for experts & SMEs.
- The related energy efficiency initiatives **DEESME**, **E2DRIVER**, **ICCEE**, **INNOVEAS**, **SMEmpOWER**, and **Triple-A** will also be part of the event.

Cork (Ireland), October 26, 2021. [SPEEDIER](#) (SME Program for Energy Efficiency through Delivery and Implementation of EnERgy Audits) will hold an online session on November 17 to present its results, lessons learned, and conclusions.

For two and a half hours, from 10 to 12:30 CET, **SPEEDIER** will go through the materials developed during the research project duration: training modules, eLearning materials and capacity building app, financing options, best practices guidelines, energy assessment support tool, etc.

SPEEDIER has also collaborated closely with the related energy efficiency initiatives [DEESME](#), [E2DRIVER](#), [ICCEE](#), [INNOVEAS](#), [SMEmpOWER](#), and [Triple-A](#) and they will take an active role as well at the webinar.

Registrations for the free venue are opened at: <https://www.eventbrite.com/e/sme-program-for-energy-efficiency-speedier-service-final-event-tickets-172849616857>

Energy efficiency in SMEs as sustainability booster in Europe

Article 8 of the European Energy Efficiency Directive (EED) requires the Member States to set up national incentives to assist SMEs to undertake energy audits. Since SMEs account for 99.98% of European enterprises and are responsible for approximately 13% of total energy demand, SMEs have enormous potential to save energy and contribute towards the ability of the EU 28 to achieve their collective targets under the EED of a 32.5% improvement in energy efficiency by 2030. To date, little of this potential has been realised with studies estimating that only 25% of SMEs in Europe have undertaken an energy audit and a range of studies citing barriers that include lack of time, resources, in-house expertise, finance, and the low priority nature of energy efficiency compared to other business needs. Article 8 also requires large enterprises to undertake energy audits every 4 years, yet a recent study suggests that only 11% of large enterprises undertaking an audit intend to implement any of its recommendations, and 2 in 5 businesses cite lack of funding or finance as a reason for inaction. It is against this background that the challenges for the **SPEEDIER** project are set.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 847034

Save the date: 17th November 2021 - SPEEDIER final event!

SPEEDIER is delighted to announce that SPEEDIER final event, *SME Program for energy efficiency: SPEEDIER Service Final Event* will be hosted online on November 17, from 10 to 12:30 (CET).

10:00 - 10:05 Welcome and Introduction to the webinar Mariana Fernandez (Sustainable Innovations)	10:10 - 10:15 Overview of SPEEDIER Patrick Lyons (IERC)	10:15 - 10:45 Related initiatives (Dedime, E2driver, Ineco, Innovas, Smartpower Efficiency Triangle)
11:00 - 11:20 SPEEDIER service: Implementation in pilot regions Romania: Ion Dogeescu (AIESEP) Ireland: Padraig O'Reilly (JIT) Italy: Nicola de Gualdi (PCL) Spain: Roxa de la Rosa (CTA)	11:20 - 11:30 SPEEDIER assessment & training apps Training: Ruth Agnew (IERC) Assessment: Diana Ramon (TEC)	11:40 - 11:50 Training for experts & SMEs. Capacity building. Padraig O'Reilly (JIT) Nicola de Gualdi (PCL)
11:50 - 12:00 SPEEDIER replication & business models Ruth Agnew (IERC) Carlos Sebastian (Sustainable Innovations)	12:00 - 12:10 SPEEDIER - Best practices & standardisation Tim Pyren (TFC)	12:25 - 12:30 Wrap up and end of event Mariana Fernandez (Sustainable Innovations)

Figure 6: Eighth Newsletter (M28)

2.5 Methodology and content

The format of the webinar was based on different live presentations (available on Annex 1) and included interactive sessions with the audience, who could send their contributions through the polls and Zoom's live chat.

SIE was the moderator, in charge of doing the introduction, transitioning between presentations, and moderating the questions and interactions with the participants. During the entire webinar, SIE was able to see who was connected, if any of the participants "raised their hand" (there is an option in the tool to do so) and all the comments in the chat.

Before the workshop, SIE organised a rehearsal to guarantee that the platform run smoothly with the main partners involved.

2.6 Materials provided

A follow up email was also sent to all the attendees, where they could find an invitation to visit the project [website](#) where the recording and presentations were uploaded. They were also invited to follow the project on LinkedIn and twitter.

SME program for energy efficiency: SPEEDIER Service Final Event

Dear friend,

Thank you very much for attending the **SME program for energy efficiency: SPEEDIER Service Final Event** webinar on November 17, we hope you liked the experience!

If you were finally not able to make it or would like to watch it again, we have uploaded the full webinar and presentations [here](#).

We invite you to keep you posted on upcoming news on our [LinkedIn](#) and [Twitter](#) channels as well.

Best regards,

The SPEEDIER team

Figure 7: Follow up email

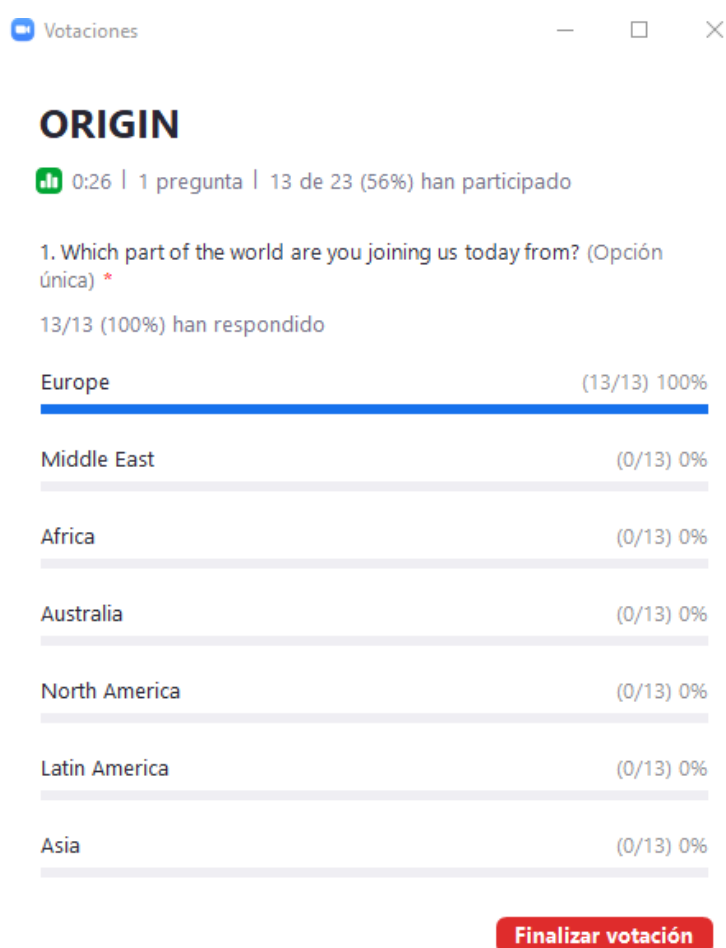

2.7 Participants

A total of 128 participants registered, of which 48 joined the webinar. Out of those 48, 17 were panellists and 31 general attendees.

Apart from the SPEEDIER consortium different organisations, representatives from the companies Grayling Andalucía, Zero-E engineering, Umwelttechnik, Torcbrewing, Stajerskagz, RINA, SEAI, Ekodoma, Arbcn, Servelect, Ecomerit, CKA, and Actexpert attended the session.

A poll was launched at the beginning of the session to know more about the profile of the attendees. Although it was stated that all of them were coming from Europe, certain people joined later from India, Latin America and Nigeria.

Regarding the professional background, the majority of the people attending were mostly engineers, energy experts and business developers.

1. What is your background? (Opción única) *

19/19 (100%) han respondido

Detener uso compartido

2.8 Discussion and engagement

During the webinar, participants had the opportunity to contribute to the event through the chat and Q&A sections with their questions or comments. Over there, two participants raised their interest in collaborating with the organisations present during the webinar in energy efficiency in Nigeria and in a possible proposal under the topic *LIFE-2021-CET-AUDITS: Uptake of energy audits recommendations for the energy transition of companies*.

There was also an interesting discussion on what energy culture meant for the different organisations present at the venue.

After the presentations of the different related projects of SPEEDIER and the general overview given on the project, the audience was asked to provide their opinion on what was the most effective approach to energy efficiency: training, energy expert support or financing and the answer was even: participants provided a 33% vote for each of the options.

2.9 Feedback

As it was an online event, the consortium decided to receive feedback from the audience through a questionnaire that popped up after the session. 18 people out of 31 voted and the general evaluation (ranking from 1 (bad) to 10 (very good)) was an average of 8,5.

Key Results - SMEs

Has your organisation had an energy audit in the last 5 years?

Key Results - SMEs

Does your organisation have an Energy Manager?

Key Results - SMEs

Does your organisation have an Energy Policy?

Setting the Scene

The EU has an energy efficiency target of 32.5% improvement by 2030.

MS must set up incentives to assist SMEs to undertake energy audits under Article 8 of the Energy Efficiency Directive (EED).

SMEs account for 99.98% of all enterprises in Europe.

Collectively, SMEs account for 13% of total energy demand in Europe.

SMEs have great potential to contribute to achieving the EU's energy efficiency targets.

Key Results - SMEs

What is the main barrier to implementing energy efficiency measures?

Answers from

What is the main barrier to implementing energy efficiency measures?

Answers from
SMEs

Answers from
energy experts

SPEEDIER: Removing barriers

Barrier	How does SPEEDIER overcome the barrier?
Lack of finance	Use SPEEDIER ring-fencing mechanism
Lack of time	SPEEDIER Expert carries out most of the work as an outsourced activity
Lack of knowledge	SPEEDIER Expert advises on best package of measures
Low priority	SPEEDIER Expert aligns energy related projects to strategic business direction & builds an energy culture
Perceived risk	Investment comes from achieved savings SPEEDIER Expert can be paid from savings
No control of building	SPEEDIER is testing the approach with landlords

How will SPEEDIER help?

SPEEDIER is an innovative onestop-shop service that takes an integrated approach to energy management.

SMEs will outsource the energy management to a **SPEEDIER Expert** who provides information, advice, energy auditing and assistance to implement ECMs

SPEEDIER is selffinancing – savings from low cost measures are ring fenced and reinvested in higher cost measures.

SPEEDIER removes the hassle from energy management and ensures the SME receives tailored advice that suits their business.

MAIN FEATURES

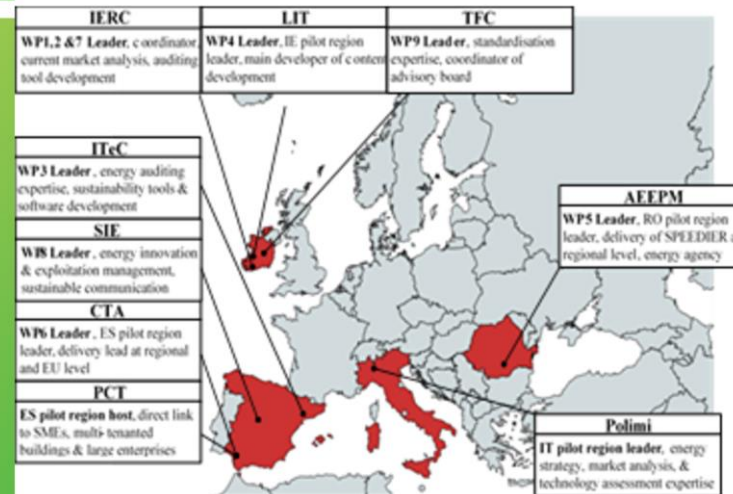

Horizon 2020 funded

€2.165M Budget

30 month duration

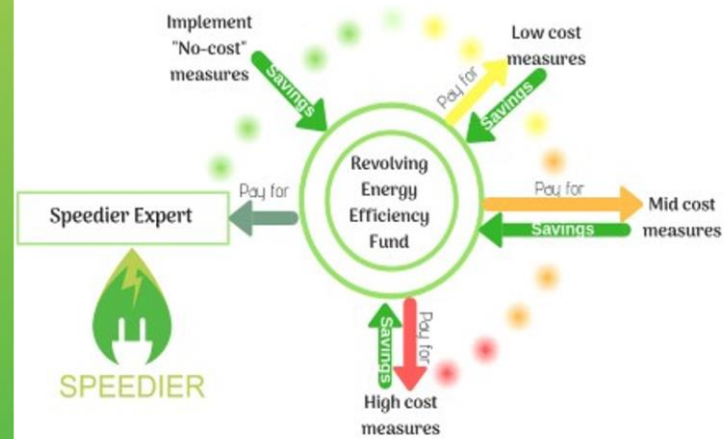

9 Partners, 4 countries

4 pilot regions
Ireland, Spain, Italy, Romania

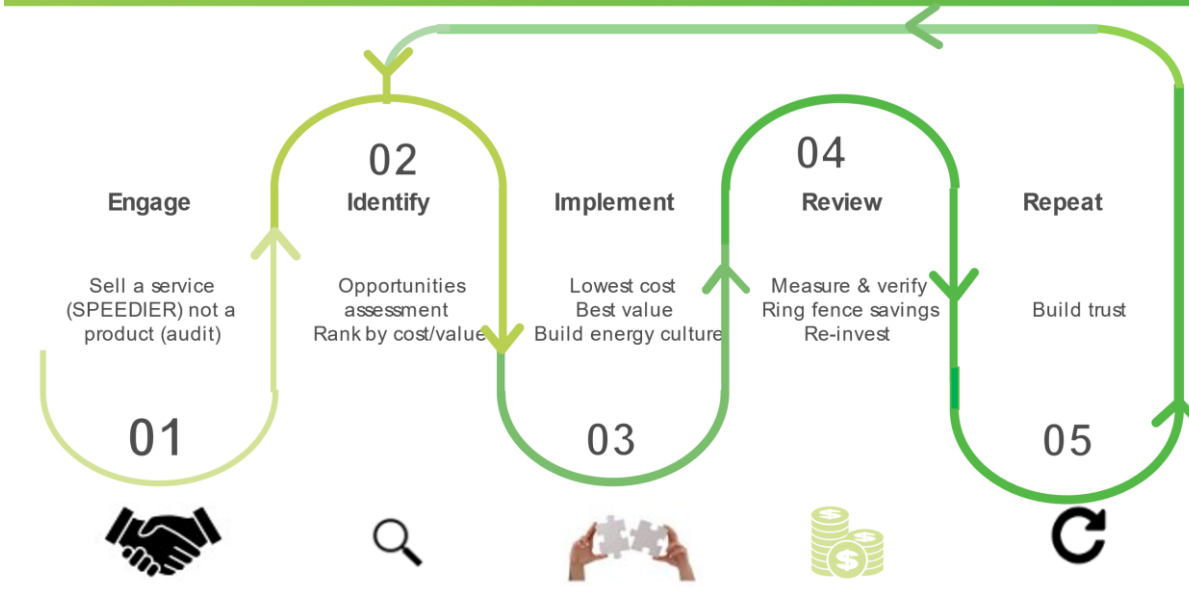

Self-financing Mechanism

Implement simple no -cost measures first
 ↓
 Ring fence savings
 ↓
 Re-invest in higher cost measures
 ↓
 Supplement with other funding sources
 ↓
 Pay SPEEDIER Expert from savings

Developing National Schemes for Energy Efficiency in SMEs (DEESME)

The responsibility for the information and the views set out in this presentation lies entirely with the authors. The European Commission is not responsible for any use that may be made of the information it contains.

DEESME objectives

Enabling companies to manage the energy transition by taking profit of multiple benefits and energy management approaches.

Supporting the development and the implementation of EU policies on energy efficiency in the framework of article 8 of the EED beyond the project by providing national authorities with guidelines proposals and recommendations on how to strengthen the national schemes.

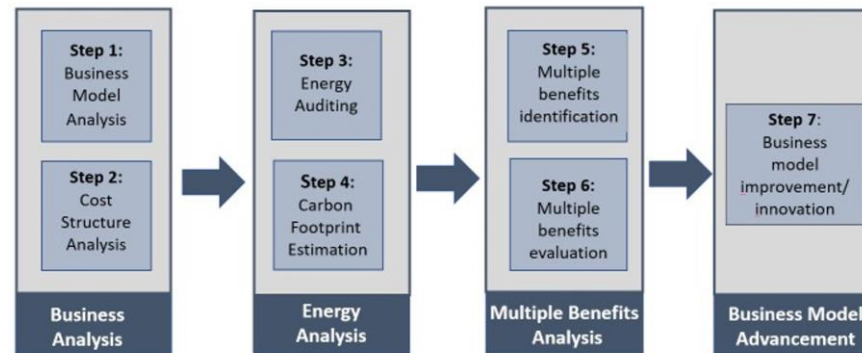

Enhancing the adoption of the DEESME approach by National Authorities beyond the project timeline through the implementation of institutionalization activities.

DEESME has received funding from the European Union's Horizon 2020 Research and innovation programme under grant agreement No 892235.

2
4

Main concepts

“Empowering” SMEs to reduce energy consumption

Motivating and facilitating SMEs

- to undergo energy audits
- to become familiar with the energy management concepts and tools
- to check for funding opportunities
- to implement energy savings measures increasing their energy efficiency

SPEEDIER Final Event

25

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 847132

The SMEPower Efficiency in numbers

- ✓ Offering **Education & Training courses** for more than **700 energy managers in SMEs**
- ✓ ON site **Short trainings** for at least **800 persons from SMEs**
- ✓ Field work in at least **160 SMEs**
- ✓ Targeted **workshops**
- ✓ **Consultation** on funding options

Long lasting training tools that SMEPower Efficiency will deliver:

- Training handbook in 7 languages
- Web platform for energy analytics
- Monitoring & Targeting and Measurement & Verification tools

SME nPower after two years

Identifying and Understanding Problems and Opportunities

- » 1st round of targeted **workshops for SMEs**
- » Reports on the **Framework analysis***, **Funding mechanisms and Certification schemes for energy auditors and managers***

Education and Training Courses for SMEs:

- » The **Design of the E&T program *** has been concluded
- » Publication of the **training handbook*** in 7 languages
- » Delivery of the **1st Edition of the E&T courses** for **270 participants**
- » In progress the **2nd Edition of the E&T courses** for **280 participants**
- » Practical action and short trainings **51+62 SMEs**

SPEEDIER Final Event

* Documents available on the project web platform

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 847132

SME nPower after two years

SME nPower web platform and Energy Analytics Tools:

- » Release of the **Web Platform** in 7 languages
- » Launch of online energy related tools for SMEs, **energy analytics, M&T and M&V tools**

Intense dissemination and communication activities

- ✓ Newsletters, Press Releases, SME nPower social accounts and pages
- ✓ Participation in various events
- ✓ Videos
- ✓ Publications
- ✓ Collaboration with sister projects

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement **N° 847095**

What has been done so far

Analysis of the current attitude towards energy efficiency; Analysis of existing regulatory and financial conditions that influence the use of energy audits; Analysis of non-technical barriers that hinder the adoption of energy audits.

Production of web-based modules for the training of SMEs, design and implementation of in-situ training programmes, design and implementation of in-company pre-audit

Creation of a network and design of the “Alliance for energy audits in SMEs”

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 847038

E2DRIVER PROJECT

- E2DRIVER is a project funded by the European **Horizon 2020** programme
- It aims to boost **energy efficiency** in the European **automotive sector**
- To that end, **small and medium enterprises** (SME) are been trained in energy efficiency measures and energy audits
- E2DRIVER is focused on 4 countries: **Germany, Spain, France** and **Italy**
- Its objective is to train **40 companies** in total, 10 per country

E2DRIVER CAPACITY BUILDING PROGRAMME

- The E2DRIVER training entails a **blended learning format**: 2/3 online, 1/3 on-site
- The training is **customizable** depending on the needs and interest of the companies.
- E2DRIVER offers **four different training paths** for: Managers, Science and Engineering professionals, Technical Managers and Technicians.

22.11.2021

41

TOOLS

- Virtual reality.
- Energy self-assessment tool & Financial assessment tool

https://youtu.be/SXzC_gQB8w

22.11.2021

42

POST-TRAINING SUPPORT

- **Identification** of potential energy efficiency measures.
- Support in the **estimation** of the impact.
- Support in the strategy of the **implementation**

BENEFITS FOR COMPANIES

- A customized and free capacity building programme on energy efficiency
- By following E2DRIVER recommendations, the company can increase **economic and energy savings**
- The company and workers can acquire **new skills** in the field of **energy efficiency** and **energy audits**

Additional benefits

- The company receives **advice** during the training period
- It receives a training **certification**
- Trainees have priority in E2DRIVER workshops and conferences
- The company can get information about the current state of the sector

E2DRIVER IMPACT

- Pilot phase: 9 pilots with 90 students.
- Replication phase: 31 replication companies in 2022.
- 65 energy efficiency measures implemented and 100 suggested.
- 13 GWh/year energy savings.
- 60 trainers of E2DRIVER Methodology.

*Triple A: Enhancing at an Early Stage the Investment Value Chain of
Energy Efficiency Projects*

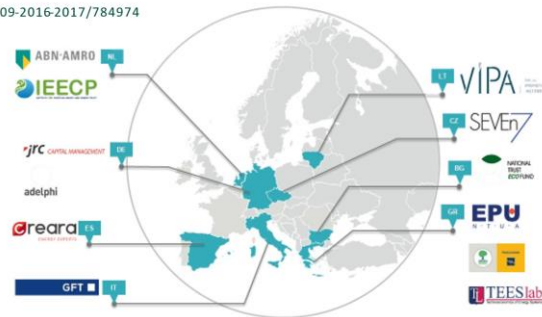

Philip Mexis

*School of Electrical and Computer Engineering
National Technical University of Athens*

GENERAL INFO

Title: Enhancing at an Early Stage the Investment Value Chain of Energy Efficiency Projects
Funding: European Union's Horizon 2020 Research and Innovation Programme -H2020-EU.3.3.7, H2020-EU.3.3.1.
Started: September 2019
Duration: 30 Months
Coordinator: National Technical University of Athens (NTUA) - Greece
 Prof. John Psarras
Participants: 12
Budget: 1.486.196,25€
Contract No: H2020-EE-09-2016-2017/784974
Grant agreement ID 846569

CONTRIBUTION

How EE financing becomes mainstream?

Triple -A scope is to:

- ❖ **Promote** investments that have a strong capacity to **meet their commitments**, at an early stage.
- ❖ **Identify** the Triple -A investments, **fostering sustainable growth**.
- ❖ **Reduce** the respective time and effort required at the crucial phase of the investments conceptualization .
- ❖ **Increase** transparency and efficiency of respective decision making.
- ❖ **Make** energy efficiency investments more attractive for investors / financiers and project developers.

THE TRIPLE -A A PPROACH

Practical result-oriented approach, seeking to answer three questions:

Assess How to **assess** the financing instruments and risks an early stage?

Agree How to **agree** on the Triple-A investments, based on selected key performance indicators?

Assign How to **assign** the identified investment ideas with possible financing schemes?

Triple-A methodology and tools offer:

- ❖ Standardised process for the identification of **attractive “Triple-A” project ideas** which merit attention by the funding organizations (bankers, funds and other financing institutions).
- ❖ **Funding strategies** (Green Loans & Mortgages, Green Bonds and Energy Efficiency Auctions) & **portfolio of EE projects** that better match with the needs of respective beneficiaries.
- ❖ Consultation process to engage national stakeholders, enable the **development implementation, testing and exploitation** of the proposed Triple-A innovative scheme for energy efficiency financing

TRIPLE-A S TAKEHOLDER ENGAGEMENT

Activity	Status	Target Groups
Bilateral & multilateral consultation	723 stakeholders identified , 65 bilateral meetings with 74 participants. 8 Triple-A Advisory Board Members - 22 bilateral meetings	A, B & C
Capacity Building Webinars & Regional Training workshops	Organisation of 9 Capacity Building Webinars in the 8 case study counties with 224 participants	A, B & C
Standardised Tools & benchmarks	627 visitors of the Triple -A Tools; 120 stakeholders signed up to the Triple-A Tools. 480 visitors of the Web-based Database	A, B & C
Online Questionnaires	198 responses in 4 Triple-A Questionnaires.	A, B, C, D & E
Lessons learnt & policy recommendations	Synthesis paper for each of the 8 case study countries under preparation.	A, B & C
Dissemination activities to raise awareness	17,000 website users; 500 recipients of the Newsletters; 400 social media followers	A, B, C, D & E

STANDARDISED TRIPLE-A TOOLS

Key elements to pave the way for identifying and financing Triple -A investments and materialize the Triple -A approach

- ❖ **Risks and maturity** of investments Evaluation .
- ❖ **EU Taxonomy compliance** : Comprehensive analysis of EU Taxonomy eligibility criteria presented to investors .
- ❖ **113 EE** financially attractive **projects** collected.

toolbox.aaa-h2020.eu
aaa-h2020.eu/tools

- ❖ **Benchmarking** of investment ideas based on **Financial , Risk and SDG** indicators .
- ❖ Electre -Tri **Multicriteria** Decision Analysis .
- ❖ **Categorisation** of projects into 3 Classes (Triple -A, Reserved , Rejected).
- ❖ **50-80 Triple -A** EE projects .

- ❖ **Requests** for Green Loans, Mortgages, Green Bonds & Energy Efficiency Auctions .
- ❖ **Matchmaking** between bankable EE projects and financing schemes .
- ❖ **Pathways** to achieve project delivery (contracts, underwriting procedures, etc .).
- ❖ Elaboration of **50 Project Fiches** .
- ❖ Submission of promising energy efficiency projects to related **European platforms** for strategic investments .

DATABASE ON EE FINANCING

DATABASE on Energy Efficiency Financing

Data on critical aspects of EE financing

- ❖ Implementation risks of EE projects.
- ❖ Risk mitigation strategies (more than 15).
- ❖ Preferences of investors on EE investments.
- ❖ Financial performance of successfully implemented EE projects.
- ❖ Financing models and instruments
- ❖ Necessity of boosting EE per case study country and sector based on SDG indices

www.database.aaa-h2020.eu

www.aaa-h2020.eu/database

- ❖ Data about the 8 Triple-A case study countries.
- ❖ Updated content on a regular basis.
- ❖ Bottom-up procedure incorporating data from stakeholder consultation.
- ❖ 480 Database users until now.

TRIPLE-A IN NUMBERS...

- ❖ 115 Energy Efficiency project ideas collected for evaluation through the Tools .
- ❖ 723 stakeholders identified, 65 bilateral meetings with 74 participants .
- ❖ More than 100 stakeholders signed up and tested the Triple -A Tools .
- ❖ Synergies with 50 relevant H2020 EU projects and relevant institutions .
- ❖ 4 Triple -A Questionnaires with 198 responses .
- ❖ 17 scientific publications in conferences and/or published in journals (4 of them under review).
- ❖ 21 Non-scientific and non-peer-reviewed publication (popularised publication, articles, blogs, etc.)
- ❖ 20 Triple -A Newsletters and Press Releases distributed to almost 500 subscribers ; Promotion of Triple -A through 22 non-consortium Newsletters (e.g. IEECP, INZEB, EENVEST, NOVICE, ICCEE, DEESME, SPEEDIER, etc.)
- ❖ Organisation of 15 Triple -A event and Participation in 71 workshops / events / webinars on energy efficiency financing .
- ❖ More 94 Dissemination and Communication materials (banners, templates, QR codes, brochures, flyers, leaflets, factsheets, infographics, videos, etc.).

Triple-A Project

[triple_a_horizon2020](https://www.instagram.com/triple_a_horizon2020)

Project Coordinator: Simone Zanoni, University of Brescia,
simone.zanoni@unibs.it

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement 847040.

Mission of the ICCEE project

Two perspectives

THE PROJECT IN STEPS

Model design and monitoring

The formulation of a model that incorporates the economic, technical and behavioural aspects of improving industrial energy efficiency, and subsequently its optimisation complemented with activities to monitor progress at the level of companies and their supply chain;

Tool development

The creation of a practical tool for users based on the model previously formulated that assists companies in estimating the potential cost and (energy and non -energy) benefits of improving their energy efficiency by considering the existing implementation barriers and that allows using benchmarks for performance comparisons;

Tool validation

The validation of the tool based on data collected from a sample of representative users/companies and their supply chain that belong to cold chains in the food and beverage sector;

Capacity building activities

The implementation of capacity building activities through training activities that integrate the use and outcome of the application tool, pilot seminars, gamification, workshops and the development and testing of an e -learning concept;

Sharing and exploiting results

The communication, dissemination and exploitation activities to reach a wide audience group and to spread the outcomes of the project.

2 Pillars

TOOL

DEVELOP AND
APPLY AN
ANALYTICAL ENERGY
EFFICIENCY TOOL
TO SUPPORT AND
FACILITATE
INVESTMENT
DECISION-MAKING

CAPACITY BUILDING PROGRAMME

A CAPACITY BUILDING
PROGRAMME AND
CREATING A
COMMUNITY TO
ACCELERATE CHANGE
IN THE ENERGY
CULTURE OF THE
FOOD & BEVERAGE
SECTOR

Allow users to estimate the energy & environmental performances of a supply chain and its actors and provide:

- suggestions for specific EEM investment
- benchmarking
- what-if analysis

4 main themes:

- Supply chain management
- LCA and LCC
- NEBs and behavioural aspects
- Financial aspects and funding opportunities

National trainings

The screenshot shows a detailed agenda for a national training session. It includes a header with logos (ICCEE, EBT, FIE, etc.) and a title in Italian: "L'efficienza energetica nella catena del freddo: benefici e prospettive". The agenda lists various topics and speakers, such as "Via alla seconda edizione del corso on line 'L'efficienza energetica nella catena del freddo: benefici e prospettive per l'industria alimentare'", "Due giornate formative gratuite per professionisti ed imprenditori in materia più opportuna da adottare, per migliorare l'efficienza energetica nella filiera frigorifera industriale del freddo, nel settore del foodservice", and "Workshop: L'efficienza energetica nella catena del freddo: benefici e prospettive". The agenda is organized into two main sections: "1. L'efficienza energetica nella catena del freddo: benefici e prospettive" and "2. L'efficienza energetica nella catena del freddo: benefici e prospettive".

Country	Responsible	Supported by	Workshops	Overall participants
Italy	SPES/GEIE	UNIBS	1	299
The Netherlands	IEECP	Contact FNIJ	2	86
Germany	ADELPHI	Fraunhofer / UniStutt	4	199

participants

Industry Informative Network

The screenshot displays the Industry Informative Network (IIN) website. The top navigation bar includes links for Home, About the IIN, Catalogue of Innovation, Community of Practitioners, Members Area, and LOGIN. The main content area is divided into two primary sections:

- COMMUNITY OF PRACTITIONERS:** This section features a "Join" button with the text "Join the European professional community on IIN" and a "Download our briefing material" button.
- CATALOGUE OF INNOVATION:** This section is further divided into two sub-sections:
 - TECHNOLOGY OFFERS:** Prompts users with "Do you have any energy efficiency solution applicable to the cold chain to propose?" and includes buttons for "Upload an offer" and "View all demands".
 - TECHNOLOGY DEMANDS:** Prompts users with "Do you seek answers to your energy efficiency challenges?" and includes buttons for "Upload a demand" and "View all offers".

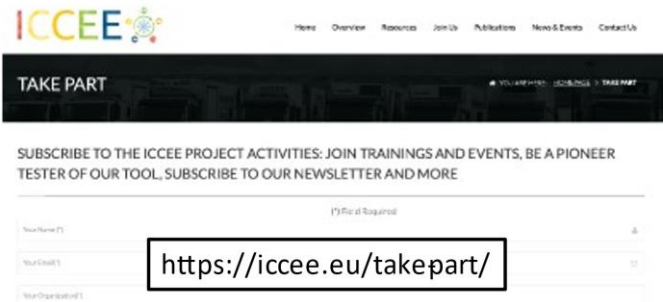

The website also features a header image showing a person looking at a refrigerated display case filled with various food products.

Benefits for companies

Companies that participate in ICCEE can:

- learn about their potential to improve energy efficiency and the ~~non~~energy benefits of energy efficiency.
- compare themselves with the supply chain energy performance of other companies and understand the opportunities energy efficiency measures bring for their companies.
- participate in the capacity building programmes that involve training and ~~learning~~ activities.

SPEEDIER

SPEEDIER Service Implementation
in Pilot Regions

Romania, Ireland, Italy, Spain

www.speedierproject.eu

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

Romania Pilot targets

KPI	Performance
35 SMEs engaged	41
SPEEDIER Experts engaged	8 trainers + 12
ECMs implementationsigned	41
4,645 MWh/year Primary Energy savings	4,723
648 tCO2/year reducing	1,143
4-15 kEuro/SME EE Investment Target	745 (total 41 SMEs)
40 Trained Staff target	266 (only 27 SMEs)

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

ECMs

- **Energy Consumption monitoring**
- **Information to guests**
- **Staff training**
- **Hot water -saving:** low-flow devices have been installed in the hotel rooms
- **Windows insulation**
- **Building insulation**
- **Integration of renewable energies:** domestic hot water from solar (forthcoming)
- **Integration of renewable energies:** electricity from PV solar sources (forthcoming)

Ireland Manufacturing SMEs and their products

1. Alltech - Animal Feeders
2. Carlow Brewing - Beers
3. P.B Machinotech - Hydraulic cylinder
4. Modular Auto – Robotics
5. Novostrat – Polyethylene foam
6. St Tola - Goats Cheese products
7. Taylormade - framed glass windshield
8. Tipp Glass – Glass Partitions
9. Torc – Brew beers and whiskey
10. Valentia Slate – Slate quarry
11. Walsh Packaging – Paper bags
12. Laois Brewery - Beer

Cheese

Modular Automation

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

Irish Pilot Success

- Very enthusiastic engagement between all SMEs and the SPEEDIER service
- Most time was spent conducting energy assessments and developing the initial ECMs to make them ready to implement, including researching funding options
- Some ECMs were started, but the many were not due to lack of time, lack of final commitment or other factors affecting the SME
- SMEs said they enjoyed working with the SPEEDIER Service and want to stay in contact for other EU funded projects or programmes.
- We learned a lot from these SMEs
- All targets were met!

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

SPEEDIER Service implementation in Italy

Activities

- Engagement of **10 SMEs** through the collaboration with ESCO
- The ESCO are supporting the SMEs in the implementation process of energy conservation measures, promoting the **ring-fencing mechanism** and exploiting SPEEDIER concepts, tools and knowledge
- Dissemination of SPEEDIER service to the SMEs staff in order to enlarge the awareness on the project and the **importance of energy efficiency**

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

SPEEDIER Service implementation in Italy

Conclusions

- **Implementation** of the service (and ECMs) is still **on-going**: the Covid-19 contingency impacts on the priorities of SMEs and some ECMs require significant structural changes of facilities
- **All the revised target parameters have been reached**, with the exception of trained staff which is slightly under the target, but likely to be increased in the last weeks of the project
- The commitment of SMEs goes beyond the end of the project

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

Energy expert support tool

- Advanced tool able to identify opportunities for ECMs within SMEs to streamline the energy auditing process.
- The tool is an online system where SPEEDIER Experts input information on the participating SME, and the tool automatically suggest a number of suitable energy conservation measures (ECMs).
- In the tool there's a follow-up of the application of the measures and the savings values.
- The tool is capable of collecting the information on real savings to improve the data in the database that provides theoretical data.
- Link on Speedier website

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

Main menus

The screenshot shows the 'Project List' interface of the SPEEDIER system. It features a header with the SPEEDIER logo and a navigation bar with icons for home, search, and other functions. The main content area displays a table of projects with columns for Project name, Building name, Date, Notes/Description, and Actions. A '+ New Project' button is located at the bottom right of the table.

	Project name	Building name	Date	Notes/Description	Actions

+ New Project

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

Project information

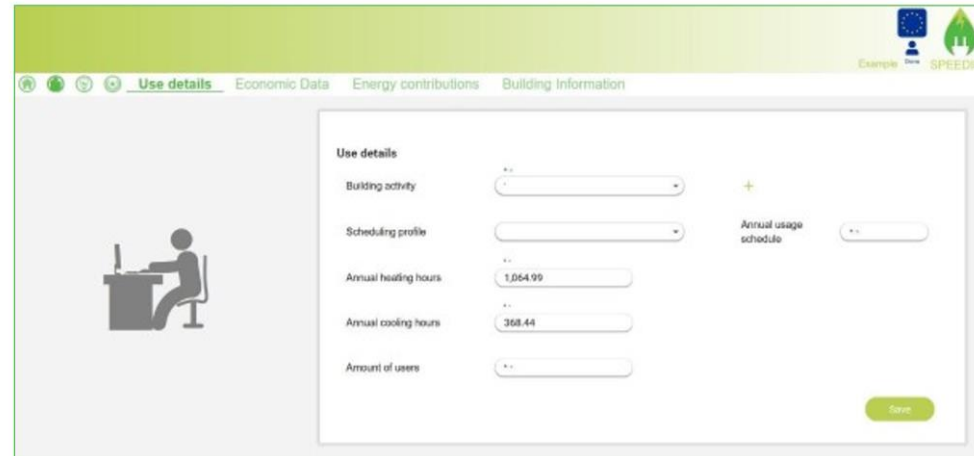

The screenshot shows the 'Project information' form in the SPEEDIER application. The form is titled 'Project information' and has a 'New project' section. It includes fields for 'Project name', 'Building name', 'Building surface (m²)', 'City', 'Main description', 'Date', 'Country', 'Region', 'Address', 'Location' (with latitude and longitude coordinates), 'Building Type', and a checkbox for 'Do you want to allow the management data of this project to be consulted in Building for all Speedier users?'. The form is set against a green header with the SPEEDIER logo and a European Union flag.

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

Building Information – Use details

The screenshot shows the 'Use details' form within the SPEEDIER application. The form is titled 'Use details' and is part of a larger interface with tabs for 'Economic Data', 'Energy contributions', and 'Building Information'. The 'Building Information' tab is active. On the left side of the form, there is an icon of a person sitting at a desk with a laptop. The form contains several input fields and a 'Save' button.

Field	Value
Building activity	[Dropdown menu]
Scheduling profile	[Dropdown menu]
Annual heating hours	1,064.99
Annual cooling hours	368.44
Amount of users	[Input field]

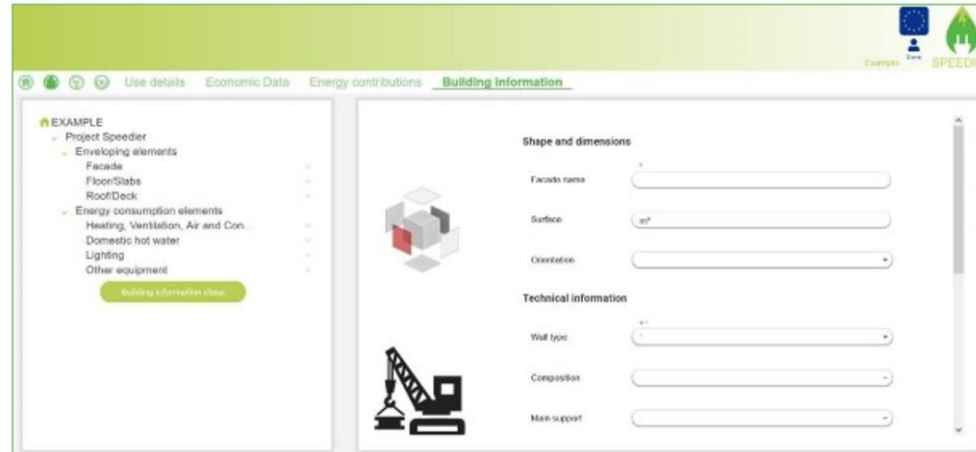

Additional fields and buttons visible:

- Annual usage schedule: [Input field]
- Save: [Green button]

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

Building Information

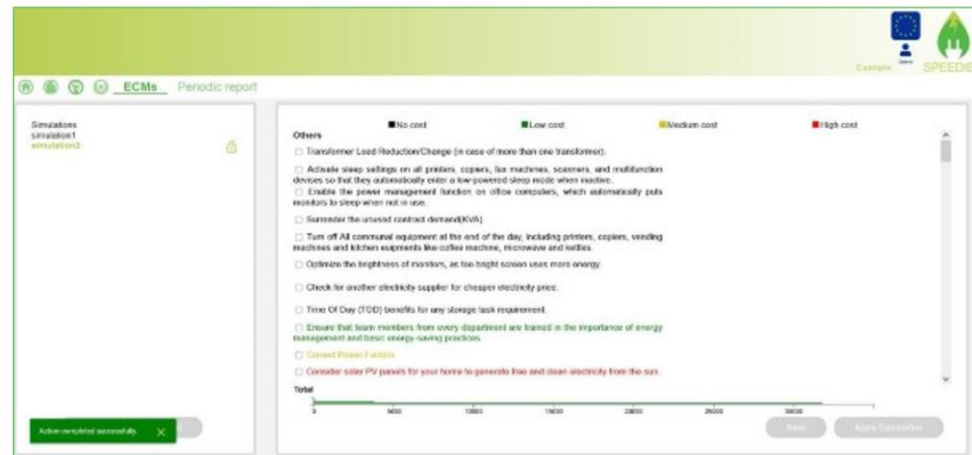

The screenshot shows the 'Building Information' section of the SPEEDIER software interface. The interface has a green header bar with the SPEEDIER logo and a user icon. Below the header, there are tabs for 'Use details', 'Economic Data', 'Energy contributions', and 'Building Information'. The 'Building Information' tab is active. On the left, there is a tree view under 'EXAMPLE' with categories 'Enveloping elements' (Facade, Floor/Slabs, Roof/Deck) and 'Energy consumption elements' (Heating, Ventilation, Air and Con..., Domestic hot water, Lighting, Other equipment). A 'Building information close' button is at the bottom of the tree. The main area contains two sections: 'Shape and dimensions' with fields for 'Facade name', 'Surface', and 'Orientation', and 'Technical information' with fields for 'Wall type', 'Composition', and 'Main support'. There are also icons for a 3D building model and a crane.

Module 2 – Behavioural Change & Ring Fencing Mechanism

Ring Fencing Mechanism

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

Module 3 – Transport

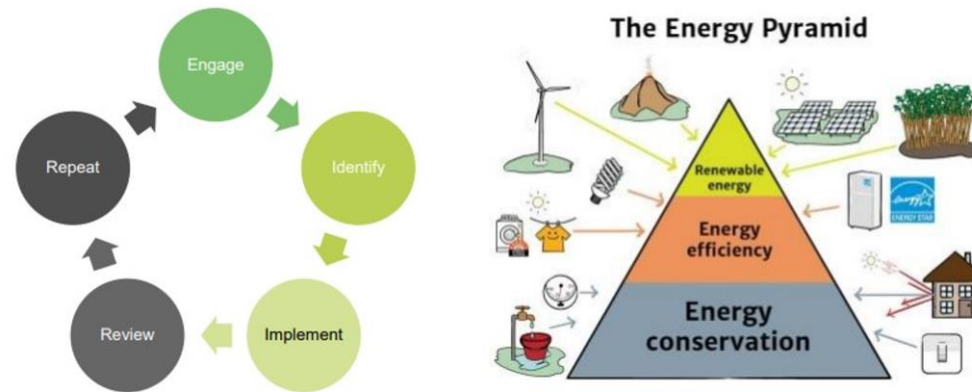

CO₂ emissions

Cars are the top Transport Carbon Emitter in Europe!

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

Module 4 – SPEEDIER Service & Energy Pyramid

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

Module 5 – Funding Options and ECM Evaluation

SEAI Funding Options

Funding name	Description	Details
Energy Efficiency Obligation Scheme (EEOS)	Energy Suppliers pay for your energy upgrades and the savings from this upgrade will be used by the Supplier to get energy credits.	Link
EXCEED	From Design stage to implementation, help is given by SEAI.	Link
Project Assistance Grants	Can provide you with a feasibility study and an Energy Project or Final business case and project delivery support grant.	Link
Accelerated Capital Allowance	Based on Triple E register of equipment, company that pays corporation tax in Ireland to deduct the full cost of the equipment from their profits in the year of purchase.	Link
Support Scheme for Renewable Heat	Incentivise the development and supply of renewable heat. Installation costs and operating support is available	Link
Energy Contracting	It's a 'pay for performance' approach to installing and operating energy technologies in your business. 50% of cost up to €7,500	Link

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

Module 6 – Engineering Calculations

Power & Energy Basic Knowledge

Power Factor Details

- Information on your reactive (kVarh), true (kW) and apparent (kVA) powers are on your electricity bill.
- Your MFC is the amount of apparent power you can draw at any time. (kVA)
- Reactive Power is not useable for Work.
- So the higher your reactive load, the less of your electricity is useable
- Power Factor fluctuates second to second.

Correcting Power Factor

- Upgrading or replacing inductive loads that do not operate close to their design capacity
- Local power factor correction at the load
- Centralised capacitive correction
- Static Var Generators (active power factor correction of lagging power factor)
- Active Power Filters (phase balancing, harmonic correction and active correction of leading and lagging power factor)
- The use of Variable Speed Drives (VSD) to control electric motors

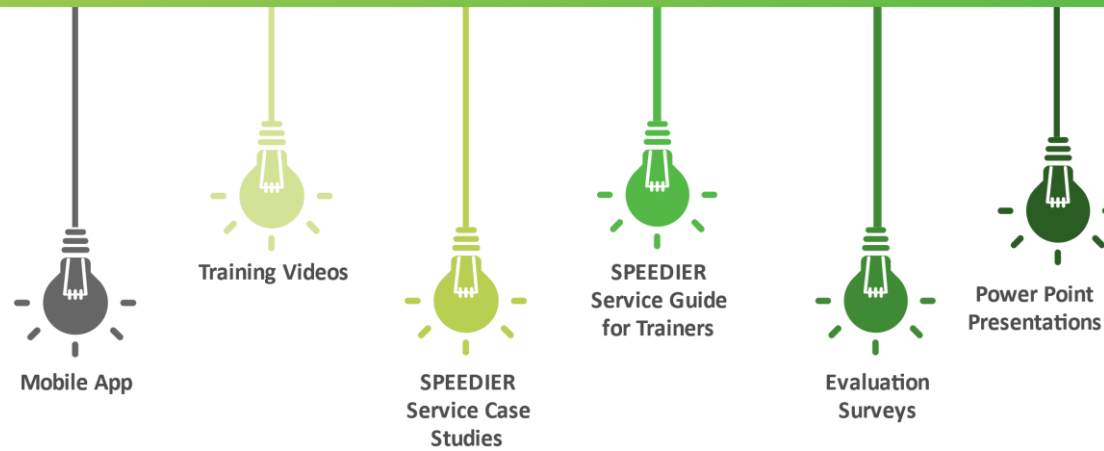

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

SPEEDIER E-learning Materials

1. Energy Experts – SPEEDIER service implementation
2. SME Staff – energy efficiency awareness and build energy culture

Energy Expert Training

- Content includes results from SPEEDIER pilot and advice on SPEEDIER service implementation
- The training content is available in English, Italian, Romanian and Spanish language.
- Education Kit for SPEEDIER Trainers: focused on providing teaching notes about how to effectively deliver training content to the SPEEDIER Experts

Energy Expert Training

- Two training events organised: **1st Training Event Agenda**

 Wednesday, 2nd December 2020	 Thursday, 3rd December 2020
10:00 - 10:05 Event opening & welcome	10:00 - 10:05 Event opening & welcome
10:05 - 10:35 Introduction to the SPEEDIER Service	10:05 - 10:50 SPEEDIER Tool for SPEEDIER Experts
10:35 - 10:50 Q&A	10:50 - 11:05 Q&A
10:50 - 11:20 Building an Energy Culture	11:05 - 11:25 SPEEDIER Mobile App
11:20 - 11:30 Q&A	11:25 - 11:55 Impact Assessment
11:30 - 12:00 New approaches to overcoming the financial barriers to energy retrofit	11:55 - 12:10 Q&A
12:00 - 12:15 Q&A	12:10 - 12:30 Event closing & Conclusions
12:15 - 12:30 Event closing & Conclusions	
                              	                      

Energy Expert Training

- Two training events organised: **2nd Training Event Agenda**

29TH SEPTEMBER 2021

10:00 - 10:05 Event opening & welcome Padraig Lyons (EPIC)

CAPACITY BUILDING FOR SPEEDIER SERVICE ROLL-OUT

10:05 - 10:35 Session 1: Introducing the SPEEDIER Service • Supporting the adoption of BES • All through SPEEDIER • Session 1a: energy efficiency and introduction to SPEEDIER <small>Padraig Lyons (EPIC)</small>	10:35 - 11:00 Session 2: The Information SKY how to manage and monitor multiple sites • Introduction to the programme • Overview of the programme <small>David O'Brien (EPIC)</small>	11:00 - 11:15 Q&A <small>Padraig Lyons</small>
---	---	---

2nd TRAINING EVENT

11:15 - 12:05 Session 3: Training modules • Overview of energy efficiency and energy efficiency technologies in the industrial process and the building • Overview of energy efficiency • How to measure the impact of energy efficiency technologies • How to measure energy efficiency • The role of the BES • Sustainability <small>David O'Brien (EPIC)</small>	12:05 - 12:20 Q&A <small>Padraig Lyons</small>
---	---

12:20 - 12:30 Event closing & final thoughts Padraig Lyons (EPIC)

30TH SEPTEMBER 2021

10:00 - 10:05 Event opening & welcome Padraig Lyons (EPIC)

10:05 - 10:35 Session 4: Funding options for Energy Efficiency • A guide to the funding options • Funding options • Funding options <small>Padraig Lyons (EPIC)</small>	10:35 - 10:55 Session 5: Final case studies • Final case studies • Final case studies • Final case studies <small>David O'Brien (EPIC)</small>	10:55 - 11:10 Q&A <small>Padraig Lyons</small>
--	---	---

11:10 - 11:30 Session 6: SPEEDIER Energy expert support tool • The project team has developed a software tool to assist energy experts to monitor multiple sites and manage energy audits and manage the energy data collection of energy efficiency measures. In this session we will show the tool and how it can be used to monitor multiple sites and manage energy audits and manage the energy data collection of energy efficiency measures. <small>David O'Brien (EPIC)</small>	11:30 - 11:50 Session 7: SPEEDIER Mobile App • The project team has developed a mobile app to be used by BES to help to monitor energy efficiency measures. In this session we will show the app and how it can be used to monitor energy efficiency measures. <small>David O'Brien (EPIC)</small>	11:50 - 12:05 Session 8: Impact Analysis • Key aspects of SPEEDIER • How the SPEEDIER impact will be quantified <small>Padraig Lyons (EPIC)</small>
--	---	---

12:05 - 12:20
Q&A Padraig Lyons

12:20 - 12:30 Event closing & final thoughts Padraig Lyons (EPIC)

Some figures about the 1st and 2nd SPEEDIER Training Events

210 Registered entities

**and interested in the
SPEEDIER project!**

Rich variety of entities

- **51** SMEs
- **29** Universities
- **23** R&D Institutions
- **14** Associations/Agencies
- **10** Authorities/Governments
- **7** Clusters
- **12** Large companies
- **41** Energy Auditors
- **23** do not identify themselves with any of the previous categories

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

Conclusions

- **1st and 2nd SPEEDIER Training** were deemed positively by attendees.
- **SPEEDIER Service** was spread to more than **200 Experts** and **Trainers**.
- A **list (database)** have been created and are available in project's website with the **Experts and Trainers** who will continue spreading the word in the future about the **SPEEDIER Service**.

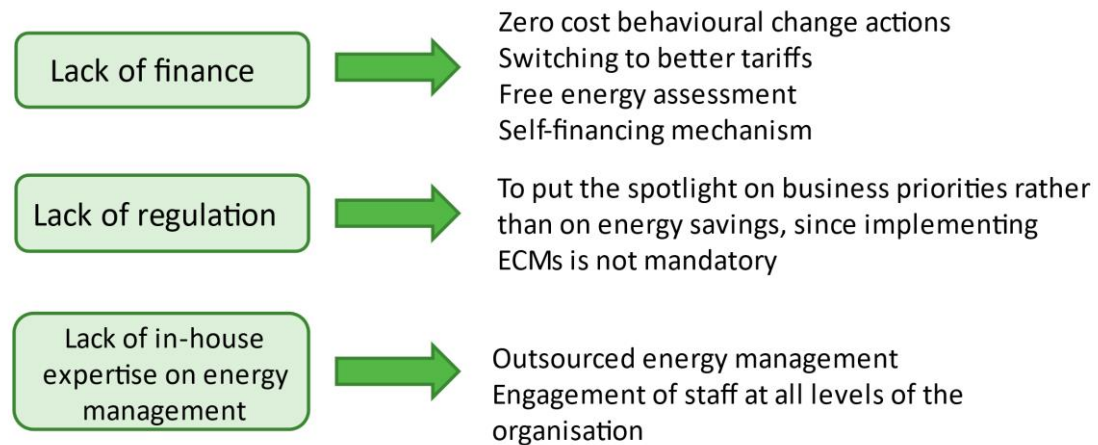

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

Barriers and recommendations to engage SMEs with energy experts

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

Additional recommendations for SPEEDIER Experts

- Engage with senior management at an early stage.
- Make SMEs understand the importance of energy management and energy efficiency along with non-cost benefits.
- SPEEDIER expert must remain neutral.

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

Survey Results

Has the SPEEDIER training increased your knowledge and skills related to energy efficiency and energy conservation?

Do you think the SPEEDIER training has had an impact on your behavior?

Do you consider yourself to be committed with the energy saving measures you have adopted, not only in your company, but also in your daily life?

Do you consider that your awareness regarding energy savings has improved as a result of your experience with SPEEDIER?

Are you motivated to carry out this behavior transition?

Would you be willing to continue collaborating in the SPEEDIER program in the future (or other similar program) to augment your energy efficiency training?

● Strongly disagree
● Disagree
● Neutral
● Agree
● Strongly agree

ct has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

Replication Recommendation

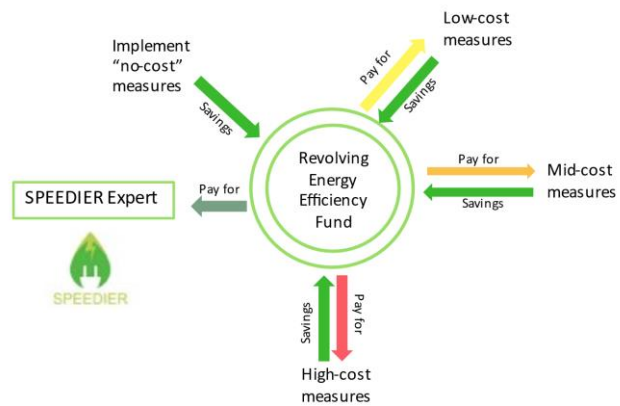

- Success of the implementation of SPEEDIER in other EU jurisdictions depends a lot on different factors such as
 - The energy culture in the country, i.e., people awareness regarding energy efficiency and energy transition.
 - work conditions for SMEs in each country
 - Government regulations on energy audit and ECM implementation
- Free energy assessment or some other financial scheme
- Flexible and easy access of training
- SPEEDIER implementation will need to be tailored to the local environment

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

SPEEDIER's Ring-fencing mechanism

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

SPEEDIER's Key Exploitable Results

1. Energy Expert Support Tool

It will work with a database of SME characteristics and no cost, low, medium, and high cost solutions. This tool will also estimate the associated energy and costs saving for these measures.

Energy agencies, SMEs and auditors

Provide the SPEEDIER expert with a non-site tool to become the SME Energy Manager, leaving the SME staff free to focus on other tasks.

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

SPEEDIER's Key Exploitable Results

2. Training and capacity building materials

a) Staff: General overview on the importance of managing energy efficiently for organizations, possible economic benefits, etc

b) SPEEDIER experts and trainers: Training and capacity building for senior managers and decision makers with techno-economic assessment of EE measures and evaluation of their impact in terms of profit margin.

SPEEDIER trainers/ experts

These capacity building and training materials will train SPEEDIER experts, but will also train future SPEEDIER trainers, which will be able to provide training to future SPEEDIER experts.

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

SPEEDIER's Key Exploitable Results

3. SPEEDIER App

Awareness and capacity building tool to be used by employees of organizations using the SPEEDIER service and for the general public.

Energy agencies, SMEs & auditors

Support tool with awareness and capacity building content, which can help in achieving the first step on energy saving, which is awareness zero-cost ECMs.

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

SPEEDIER Business Models

The **one-stop-shop** solution is expected to solve several of the **SMEs initial barriers to implement energy audits** and energy efficiency measures.

This will also be a further motivation to reach the energy efficiency goals set for EU member states in the coming years.

This Project has received funding from the European Union's Horizon 2020 Research and Innovation Programme under Grant Agreement N. 847034

Power frequency overvoltage protective devices (POPs) for household and similar applications.

UNE, NEN, DIN, NSAI, etc.

ABOUT THE PROJECT

SPEEDIER is a highly innovative one stop-shop solution that applies an integrated approach to energy management, providing information, advice, capacity building, energy auditing, financing, implementation of energy efficiency solutions and monitoring of impacts.

Standards in practice

Invisible but is everywhere to make life easier.

ISO50001 was first published in 2011 to assist organisations in implementing structured, sustainable Energy Management Systems (EnMS) to **deliver savings in energy, emissions and money**. To date in excess of 20,000 organisations have successfully implemented systems that have been certified to ISO50001.

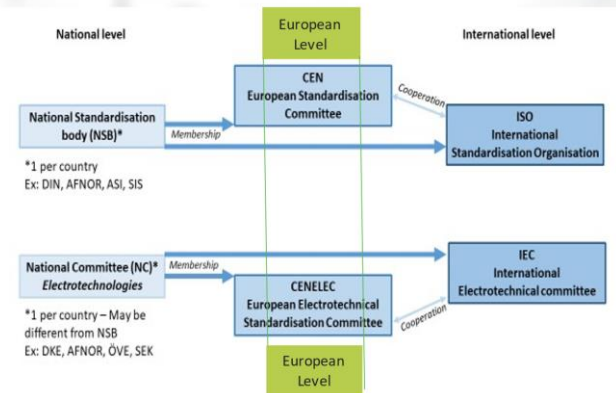

AUS study found that companies which implemented EnMS compliant with ISO50001, delivered **average savings of 10%** within 18 months with a 2 year payback for companies spending > €1.5m on energy annually. Notably, **75% of the savings delivered were low cost measures requiring no capital investment**

ABOUT THE PROJECT

SPEEDIER is a highly innovative one stop-shop solution that applies an integrated approach to energy management, providing information, advice, capacity building, energy auditing, financing, implementation of energy efficiency solutions and monitoring of impacts.

Standards in practice

Invisible but is everywhere, to make life easier.

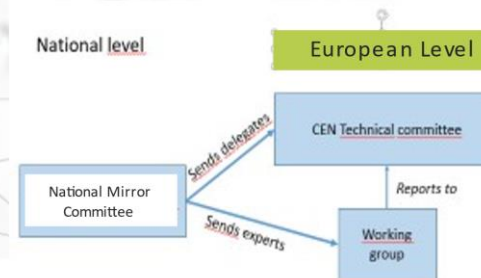

ABOUT THE PROJECT

SPEEDIER is a highly innovative one stop-shop solution that applies an integrated approach to energy management, providing information, advice, capacity building, energy auditing, financing, implementation of energy efficiency solutions and monitoring of impacts.

Standards in practice

Invisible but is everywhere, to make life easier.

European Level Standards

CEN/CENELEC

Who are they?

- Aim to provide professional, neutral, **independent platform for stakeholders** to come together and reach a consensus at European level.
- There to help ensure that the system respects the principles of **transparency, openness, coherence, consensus** as laid down by the World Trade Organisation.
- Support established Technical Bodies in the development of their **standardization / pre-standardization** deliverables.

How to get involved?

- Screen existing standards.
- Join an existing standardization community.
- **Revise an existing European standard or develop a new one.**
- Fast track to new standardization.

European Level Standardisation So called fast-track to new standardization

CEN/CENELEC :

A EU-recognized body with experience in building understanding between stakeholders from various countries and backgrounds.

Workshop:

A framework to exchange and work for the delivery of a publicly available referenced document from CEN Members National Standard Bodies. A CEN Workshop Agreement (commonly abbreviated CWA), by definition, is not an official standard from the member organizations.

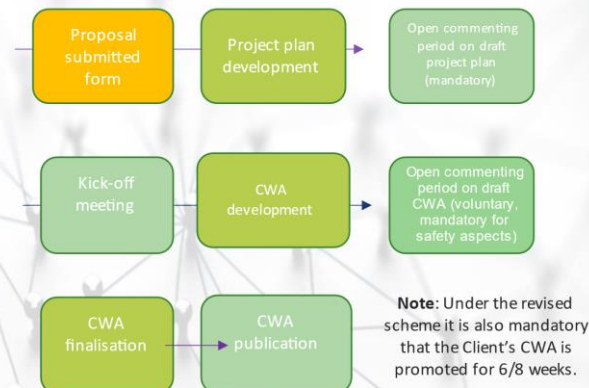

Agreement

A reference document to be disseminated throughout Europe.

- CWA process is **promoted** as an enabling mechanism to ensure a fast and inclusive development with a number of CEN/National Standard Body administrative steps for the delivery of a reference document (not a standard but a pre-standardization document at best).
- Maybe suited for innovative subjects and might act as a stepping stone, before a broader range of countries and stakeholders can take up the subject.
- Supports networking activities.

So called fast-track to new standardization

Revised CWA mechanism:

Note: Under the revised scheme it is also mandatory that the Client's CWA is promoted for 6/8 weeks.

Bulk of the work done by the Client. The NSBs provide the Secretariat to engage with CEN/CENELEC mainly on administrative

So called fast-track to new standardization

Background :

- CWA mechanism has been around since 2001.
- Heavily promoted by CEN/CENELEC and National Standardisation Bodies (NSBs).
- Many CWAs exist (1,000+).
- They are a CEN/CENELEC reference document at best - not a standard.
- Historically, few CWAs have been turned into standards.
- CWA mechanism was revised in the H2020 Stair4Security project (ended June 2021). Members of the project were divided. The balance of the consortium was steered towards CEN/CENELEC & NSBs. **Alternative Better Practice Guide initiative** is being developed by participants from that project that do not involve CEN and NSBs.
- CWA mechanism is not an open system. Closed to CEN/CENELEC, the National Standardization Bodies and the client.
- **It is costly**, which was a contributing factor for SPEEDIER to decline progress beyond the CWA project plan.
NSB Secretariat details
 - NSB a) Do not provide the CWA service.
 - NSB b) No resources available for the role of the Secretariat
 - NSB c) 37K for the secretariat role and stage payments
 - NSB d) 28.5K for the same role.

In short, many share the perception that the tail is wagging the dog.

So called fast-track to new standardization

European Commission – DG-Home: (September 2021)

While some research projects deliver tangible CEN Workshop Agreement Workshops (CWAs) and made progress in standardisation related research ..
.. **no mechanism yet exists** to ensure that standardisation is developed in close cooperation with key stakeholders such as **policy-makers and practitioners at all levels** (European, regional, national, local).

Call Topic: Horizon-CL3-DRS-01-4 (Deadline 23rd November 2021)

Developing a prioritise mechanism for research programming in standardization related to natural hazards and/or

Now the tail is turning!

Pre-Standardisation – A fresh-thinking approach

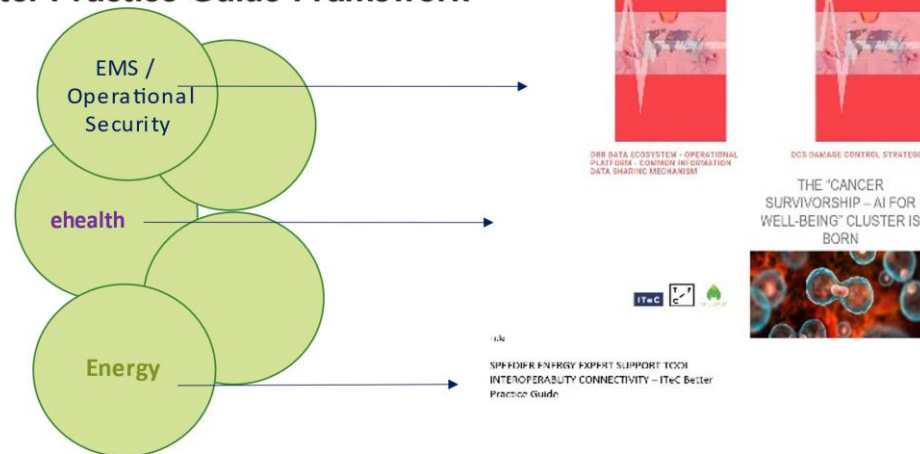

Better Practice Guide Initiative :

- Fresh-thinking **pre-standardisation** initiative that is being developed to be applicable across a series of sectors
- Designed to **empower** pre-standardisation development with **experts** and practitioners
- Designed to be flexible:
 - **You** do it the way that works for you - stay as a 'de facto' pre-standard or move it later to a full standard
 - **You control** the pre-standardisation journey
- Designed to **encourage more expert/ practitioner engagement to get involved** who otherwise would not engage in pre-standardisation/standardisation
- Designed for **low cost** production

Dog beginning to wag the tail.

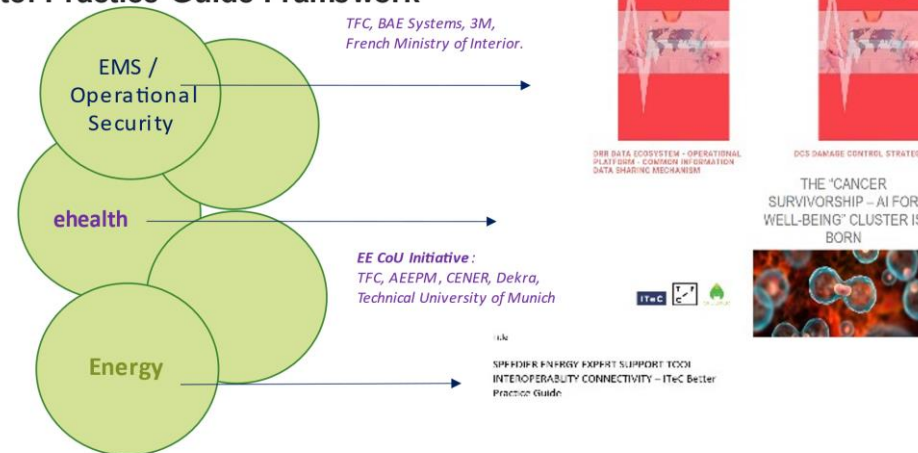

Pre-Standardisation – A fresh-thinking approach

Better Practice Guide Framework

Pre-Standardisation – A fresh-thinking approach

Better Practice Guide Framework

Better Practice Guide

SPEEDIER Service self-financing mechanism

SPEEDIER ENERGY EXPERT SUPPORT TOOL INTEROPERABILITY CONNECTIVITY – ITeC Better Practice Guide

- **ITeC** (www.itec.es) developed a software tool for energy saving measures.
- SPEEDIER energy experts are able to provide input information on the engaging SME building.
- Tool automatically suggests a number of suitable energy conservation measures (ECMs) across each of the SPEEDIER cost category (i.e., no cost, low cost, medium cost and high cost) by accessing the ITeC BEDEC database.
- The tool select solutions that match the constraints set by the individual SPEEDIER energy expert.
- Helps the energy expert to decide on the inclusion or exclusion of ECMs.
- Estimate associated energy and cost savings.

Better Practice Guide

SPEEDIER Service self-financing mechanism

SPEEDIER ENERGY EXPERT SUPPORT TOOL INTEROPERABILITY CONNECTIVITY – ITeC Better Practice Guide

- Article 8 of the [Energy Efficiency Directive](#) requires the European Member States to develop instruments (i.e., Projects, Tools and Policies) encouraging SMEs to undergo energy audits and to implement their recommendations in the process.
- Better Practice Guide focuses on interoperability the integration component of the SPEEDIER Software energy saving measures tool.
- It is also in line with the European Commission Directive [COM (2017) 134] for the European Interoperability Framework- Implementation Strategy.

Better Practice Guide

SPEEDIER Service self-financing mechanism

SPEEDIER ENERGY EXPERT SUPPORT TOOL INTEROPERABILITY CONNECTIVITY – ITeC Better Practice Guide

- Better Practice Guide in a 'living' document and was delivered to strengthen the interest and uptake of the SPEEDIER Service and components.
- It addresses the tool architecture and the vocabulary and application programming interface (API) constructs of a common information space for the sharing of knowledge at semantic level in line with TeC security protocol.

Better Practice Guide

SPEEDIER Service self-financing mechanism

SPEEDIER ENERGY EXPERT SUPPORT TOOL INTEROPERABILITY CONNECTIVITY – ITeC Better Practice Guide

Better Practice Guide defines:

- **Resource Description** Vocabularies to describe the different types of resources to enable the different related energy management platforms, tools or ecosystem to technically exchange resources.
- **SPEEDIER Services Tool**: Agree on a minimal set of APIs (Application Programming Interface) to be implemented by any platform / software tool operating in the energy efficiency domain, through which requests for services can be made.
- **Security & Accessibility Profile for Resources and Services** Set of security specifications to be associated with resources and services maintained on the SPEEDIER software energy expert support tool.

ABOUT THE PROJECT

SPEEDIER is a highly innovative one stop-shop solution that applies an integrated approach to energy management, providing information, advice, capacity building, energy auditing, financing, implementation of energy efficiency solutions and monitoring of impacts.

SPEEDIER ENERGY EXPERT SUPPORT TOOL INTEROPERABILITY CONNECTIVITY – ITeC Better Practice Guide

Having an interoperability capability has been identified as a key characteristic for the uptake of the SPEEDIER Service beyond the life of the project.

Article (no. 8) of the [Energy Efficiency Directive](#) (EU EED) requires the European Member States (E27) to develop instruments (i.e., Projects, Tools and Policies) encouraging SMEs to undergo energy audits and to implement their recommendations in the process.

ABOUT THE PROJECT

SPEEDIER is a highly innovative one stop-shop solution that applies an integrated approach to energy management, providing information, advice, capacity building, energy auditing, financing, implementation of energy efficiency solutions and monitoring of impacts.

SPEEDIER ENERGY EXPERT SUPPORT TOOL INTEROPERABILITY CONNECTIVITY – ITeC Better Practice Guide

"The Speedier Better Practice Guide, through the API engagement mechanism will enable other software related companies to engage with us and therefore be in a position to know the investment of energy rehabilitation actions and their payback period in line with ITeC engagement methodology. In addition, it will be permissible to have access to databases of buildings and their savings in accordance with the previously established actions, therefore, they will be able to establish reference values for energy rehabilitation actions and know the actions with a better return, energy and economic."

Licino Alfaro.
Head of the Department of Sustainable
Construction
ITeC
